Introduction

## Letter from the Executive Director

It is with great pleasure that I submit the annual report of the Missouri Consolidated Health Care Plan (MCHCP) for the period ended June 30, 2019. MCHCP is a component unit of the state of Missouri for financial reporting purposes and as such, the financial reports are also included in the state of Missouri's Comprehensive Annual Financial Report (CAFR). The financial information presented in this report is the responsibility of management of MCHCP and sufficient internal accounting controls exist to provide a reasonable assurance regarding safekeeping of assets and fair presentation of the financial statements, supporting schedules and statistical tables. Systems and procedures are evaluated in conjunction with the Board of Trustees, MCHCP management and Internal Audit to provide assurances that internal controls exist and are functioning to promote objectives while minimizing risk. Reasonable assurance recognizes that the cost of a control should not exceed the benefits to be derived; the objective is to provide reasonable, rather than absolute assurance, that the financial statements are free of material misstatements. The report is also designed to comply with the provisions of section 103.025 of the Revised Statutes of Missouri (RSMO) as amended. Financial information can be found in the management discussion and analysis, financial statements, notes to the financial statements and statistical sections included in this report.

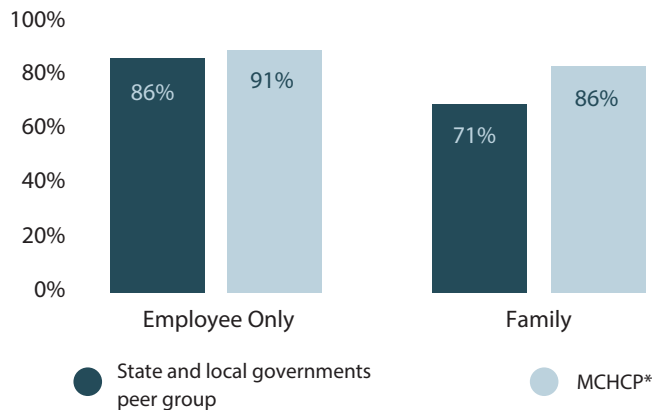

With immense pride in the accomplishments of service to our members, it is my honor and privilege to be part of MCHCP's 25th year of operations. MCHCP was established on January 1, 1994, to provide health care benefits to most state employees, retirees and their dependents, and public entities within the State. Throughout these 25 years, MCHCP has remained dedicated to providing health care coverage that is both affordable and comprehensive in often challenging economic times.

During fiscal year 2019, the Plan determined a need to modify plan designs to align more closely with available funding and financial resources after seven years of very little change. For our active employees and non-Medicare retirees, a Health Savings Account plan and two preferred provider organization (PPO) plans with increased member cost-sharing responsibilities were offered effective Jan. 1, 2019. In addition, to give our members the most value, MCHCP added

new benefits including an online weight management program and virtual online physician visits. For our Medicare retiree members, a fully-insured group Medicare Advantage (PPO) plan replaced the traditional PPO offering. As the chart presents, even in challenging economic times, MCHCP's share of premium remains higher than comparators from state and local government peer groups for both employee and family coverages.

During the fiscal year ended June 30, 2019, the state of Missouri contributed more than \$482 million, or approximately 70 percent of revenues, to the Plan in the form of employer-sponsored contributions. Member contributions for our state members exceeded \$127 million while revenues for public enrollment approached \$7.8 million. The ability to maintain the financial strength of the Plan is incumbent on contributions from the State, premium contributions from members, diligence to plan design, and improving the health risk profiles of our membership.

## MCHCP Share of Premium - 2019

\*Contributions from the state and MCHCP trust fund.

This report is a product of the combined efforts of the MCHCP staff and the Board of Trustees. It is intended to provide reliable information as a basis for making management decisions, for determining compliance with legal provisions and for evaluating the condition of the fund. Brown Smith Wallace LLC, conducted an independent audit of the basic financial statements in accordance with U.S. generally accepted auditing standards. MCHCP has received an unmodified opinion from our independent auditors whose report can be found on pages 24-25.

This annual report is provided to the Governor, the State Auditor, members of the General Assembly, all state agencies and all participating public entities and is viewable at [www.mhcp.org](http://www.mhcp.org). The cooperation and support of these individuals and agencies help contribute to our success. Also, for the Board of Trustees, I extend my gratitude to the staff who work diligently to provide the quality member service you have come to expect from MCHCP.

For the twenty-fourth year in a row, MCHCP was pleased to receive the Government Finance Officers Association of the United States and Canada (GFOA) Certificate of Achievement for Excellence in Financial Reporting for its CAFR for the fiscal year ended June 30, 2018. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to qualify, a government unit must publish a report conforming to all GFOA standards. MCHCP will continue to strive for such recognition with its submission of this report for consideration to GFOA.

Thank you for these 25 years. Without the dedication of the many men and women who have served on the Board of Trustees throughout the years, all our present and past employees and you, our members, this accomplishment and the future success of the Plan would not be possible. I welcome your suggestions for the continued success and improvement of your health plan, MCHCP.

Yours in health,

A handwritten signature in black ink, appearing to read "Judith Muck". The signature is fluid and cursive, with the first name "Judith" being more prominent than the last name "Muck".

## Letter from the Chairperson

It is my distinct pleasure to present to you, on behalf of the Board of Trustees, the Comprehensive Annual Financial Report for the Missouri Consolidated Health Care Plan (MCHCP) for the period ended June 30, 2019.

As Chairperson, I am honored to serve on the MCHCP Board of Trustees. At my request, James R. McAdams, Office of Administration Deputy Commissioner and General Counsel serves as my designee on the MCHCP Board of Trustees. Fiscal year 2019 is the Plan's 25th year of operations and the Board is privileged to continue providing affordable and comprehensive health coverage to state and public employer members. The General Assembly created MCHCP in 1992 through House Bill 1574 with operations commencing in January 1994 and tasked the Plan with covering medical expenses of its members. We respectfully honor the work done before this Board in the prior 25 years and look forward to the continued opportunities, challenges and milestones in leading the Plan forward.

The Board of Trustees, supported by the Plan's management, has designed and implemented internal and accounting controls in providing reasonable assurances of the financial records and safekeeping of Plan assets while incorporating financial transparency to those interested in the results of operations. During fiscal year 2019, the Plan received more than \$482 million in state appropriations, an increase of approximately \$79 million over fiscal year 2018, toward the maintenance of the state's share of employee and retiree health care benefits. State members contributed over \$127 million toward their share of premium and return on investment totaled more than \$7 million.

MCHCP expenditures for self-funded medical and pharmacy benefits, a fully-insured group Medicare Advantage (PPO) plan and fully-insured dental and vision benefits during fiscal year 2019 were approximately \$647 million; representing a decrease of approximately two percent over fiscal year 2018 totals. Although encouraged by these statistics, our work is not complete, as during fiscal year 2019, approximately three percent of our membership presented as a high cost claimant, defined as those with expenses over \$50,000, accounting for almost 43 percent of total MCHCP medical health care costs. Working with our membership to improve their health through strategies structured around

healthy lifestyles, weight management and access to care assists in supporting the fiscal health of Plan operations.

On behalf of the Board of Trustees, we value and appreciate the more than 94,000 state and public members we serve and the dedicated MCHCP staff, advisors and vendors who have worked diligently in the administration of the Plan over these 25 years. We look forward to continuing our work together to provide affordable and comprehensive health coverage.

Respectfully,

A handwritten signature in dark ink, reading "Sarah Steelman". The signature is written in a cursive, flowing style.

# Summary of Plan Provisions

## VISION

To be recognized and valued by our members as their advocate in providing affordable, accessible, quality health care options.

## PURPOSE

Established Jan. 1, 1994, the Missouri Consolidated Health Care Plan (MCHCP) or the Plan was created to provide health care benefits to most state employees, retirees and their dependents, and public entities within the state that join the Plan.

## MISSION

To provide access to quality and affordable health insurance to state and local government employees. We will accomplish this by:

- Consolidating purchasing power and administration to achieve benefits not available to individual employer members
- Creating collaborations to ensure the needs of individual members are understood and met
- Ensuring fiscal responsibility
- Developing innovative delivery options and incentives
- Identifying and contracting with high-value plans
- Maintaining a high-quality and knowledgeable work force

## ADMINISTRATION

MCHCP administers medical, dental and vision benefits and the Strive Employee Life & Family (SELF) program for most members of the Missouri State Employees' Retirement System, Judicial Retirement Plan, some members of the Public School Retirement System, legislators, statewide elected officials and eligible

public entity members. In addition, dental and vision benefits are available to employees and retirees of the Departments of Conservation and Transportation, and the Missouri State Highway Patrol. SELF program benefits are available to active employees eligible for MCHCP medical coverage and members of their household.

Missouri statutes provide that the administration of MCHCP be vested in a 13-member Board of Trustees. The Board is composed of:

- The Director of the Department of Health and Senior Services, serving ex officio
- The Director of the Department of Insurance, Financial Institutions and Professional Registration, serving ex officio
- The Commissioner of the state Office of Administration, serving ex officio
- Two members of the Senate, appointed by the President Pro Tem of the Senate
- Two members of the House of Representatives, appointed by the Speaker of the House of Representatives
- Three members appointed by the Governor with the advice and consent of the Senate (All three members appointed by the Governor shall be citizens of the state of Missouri who are not members of the Plan, but who are familiar with medical issues.)
- Two members of the system who are current employees, elected by a plurality vote of members of the system who are also current employees
- One member of the system who is a retiree, elected by a plurality vote of retired members of the system.

The management of MCHCP is the responsibility of the Executive Director, who is appointed by the Board of Trustees and serves at its pleasure.

The Executive Director acts as advisor to the Board on all matters pertaining to MCHCP and, with the approval of the Board, contracts for professional services and employs the staff needed to operate the organization.

## MEDICAL PLANS

MCHCP offers three medical plans - the Health Savings Account Plan (HSA) Plan, and two Preferred Provider Organization (PPO) plans - the PPO 1250 and the PPO 750. All three of MCHCP's medical plans offer the same benefits, such as:

- 100% coverage of preventive care - such as preventive exams, vaccinations, age-specific screenings and much more - when using a network provider.
- Choice of health care providers, pharmacies and hospitals from a nationwide network, usually at a lower cost.

### HEALTH SAVINGS ACCOUNT PLAN (HSA PLAN)

The Health Savings Account (HSA) Plan is a qualified high-deductible plan that gives non-Medicare primary members access to network providers at a lower cost. MCHCP's HSA Plan has a lower or no-cost premium with a higher deductible, when compared to other MCHCP medical plans.

The Internal Revenue Service establishes maximum annual HSA contribution amounts, but there is no limit on the balance of the HSA. MCHCP contributes funds to active employee's HSAs on an annual basis. HSA funds can be used for qualified medical expenses.

### PREFERRED PROVIDER ORGANIZATION (PPO) PLANS

MCHCP's PPO plans give MCHCP members access to network providers at a lower cost. The PPO 1250 Plan has a moderately-priced premium and the PPO 750 Plan has the highest premium, when compared to other MCHCP medical plans.

The PPO plans have network benefits that require a deductible be met before claims are paid at 80%. Non-network benefits have higher out-of-pocket expenses.

### PRESCRIPTION DRUG PLANS

MCHCP medical plan members are automatically enrolled in the prescription drug plan (PDP). Medicare primary members are enrolled in a Medicare Part D PDP. Both non-Medicare and Medicare primary PDPs use a broad network of retail pharmacies and one specialty pharmacy. The drug formulary covers a wide array of drugs and promotes the use of generics.

## DENTAL PLAN

The dental plan offers comprehensive dental benefits through a nationwide network of participating providers. Preventive care, such as examinations and cleanings, is covered at 100 percent and does not count toward the plan year maximum benefit amount. Additional cleanings are provided for members who are pregnant, diabetic, have a suppressed immune system or have a history of periodontal therapy. The plan also covers fillings, extractions, root canals, bridges, dentures, crowns, the treatment of gum disease and other services with varying deductibles and coinsurance.

## VISION PLAN

The vision plan offers vision benefits through a nationwide network of participating providers. Basic and premium plans are offered with set copayments for services received from network providers and allowances for services obtained from non-network providers. The plan covers examinations, lenses, frames, contact lenses and corrective laser surgery. Members can receive discounts on additional glasses and sunglasses from any provider, accepting those discounts, within 12 months of an eye exam.

## STRIVE EMPLOYEE LIFE & FAMILY PROGRAM (SELF)

The Strive Employee Life & Family (SELF) program, previously called the Employee Assistance Program (EAP), is a confidential counseling and referral service that can help employees and their families reduce stress, improve health and enhance life balance. SELF program services are available at no cost to all state employees eligible for MCHCP medical coverage and members of their households. Eligible employees and members of their household can keep using SELF services for 18 months following retirement and through the month after they are laid off. Household members can also use the SELF program for six months after a subscriber's death.

The program offers behavioral health counseling services, legal and financial services, and identity theft and fraud resolution services. The SELF program also offers everyday support through FamilySource® to assist with every day issues such as child and elder care, moving and relocation, making major purchases, vacation planning and much more simply by calling or accessing expert help online.

## STRIVE FOR WELLNESS® PROGRAM

The *Strive for Wellness*® program provides evidence-based initiatives and resources designed to help most members better understand and manage their health.

Major strategies focus on empowering members to proactively receive preventive health screenings, manage chronic conditions, and to lead overall healthier lives. *Strive for Wellness*® offers premium reductions for eligible members who participate in the Partnership and Tobacco-Free Incentives.

In addition, the *Strive for Wellness*® team - comprised of expert clinicians and health educators - teaches employees how to make healthy lifestyle choices. The team creates health education videos and leads health-education events and related activities, such as blood pressure screenings and an annual state employee 5K Run/Walk. Registered dietitians teach on-site weight management courses several times each year and registered nurses lead quit tobacco courses in state office buildings.

In an effort to broaden wellness opportunities to all state employees, particularly in regions located outside the capitol complex, wellness ambassadors and building wellness teams were created. These individuals and groups help organize on-site activities and services, reaching more employees where they work.

### *STRIVE FOR WELLNESS*® HEALTH CENTER

The *Strive for Wellness*® Health Center brings basic health care to active state employee subscribers enrolled in an MCHCP medical plan. The Center offers routine care for common illnesses, basic preventive care, and behavioral health counseling services, at hours designed to fit into a hectic workday. It is conveniently located in Jefferson City's Harry S Truman Building.

## Independent Auditor's Report

Board of Trustees  
Missouri Consolidated Health Care Plan  
Jefferson City, Missouri

### Report on the Financial Statements

We have audited the accompanying financial statements of each of the two major funds (Internal Service Fund and State Retiree Welfare Benefit Trust) of Missouri Consolidated Health Care Plan (the "Plan") as of and for the fiscal year ended June 30, 2019, which collectively comprise the Plan's basic financial statements as listed in the table of contents.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with generally accepted accounting principles in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with generally accepted auditing standards in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to error or fraud. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

AN INDEPENDENT FIRM ASSOCIATED WITH MOORE GLOBAL NETWORK LIMITED  
MEMBER AMERICAN INSTITUTE OF CERTIFIED PUBLIC ACCOUNTANTS  
BROWN SMITH WALLACE IS A MISSOURI LIMITED LIABILITY PARTNERSHIP

# Report of Independent Auditors

## **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of each major fund of the Plan as of June 30, 2019, and the respective changes in financial position and cash flows for the fiscal year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Required Supplemental Information**

U.S generally accepted accounting principles require management's discussion and analysis and the required supplementary information as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the GASB, who considers it to be an essential part of the financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with generally accepted auditing standards in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

## **Introductory and Statistical Sections**

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Plan's basic financial statements. The introductory section and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

# Management's Discussion & Analysis

Management's Discussion and Analysis provides an overview of the financial position and activities of the Missouri Consolidated Health Care Plan (MCHCP) for the fiscal years ended June 30, 2019 and 2018. The information presented here should be considered in conjunction with the financial statements and notes. MCHCP is a component unit of the State of Missouri and is included in the State's Comprehensive Annual Financial Report (CAFR).

MCHCP's financial statements are prepared in accordance with U.S. generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board (GASB).

## FUND ACCOUNTING

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. MCHCP, like other discretely presented component units of the state of Missouri (as defined by GASB Statement No.14), uses fund accounting to ensure and demonstrate compliance with finance related legal requirements. There are three categories available for governmental accounting: governmental funds, proprietary funds and fiduciary funds. The internal service fund (ISF) is considered to be a proprietary fund while the state retiree welfare benefit trust (SRWBT) is classified as a fiduciary fund. MCHCP does not have any governmental funds.

*Proprietary funds.* Proprietary funds account for governmental operations that are designed to be self-supporting from fees charged to consumers for the provision of those goods and services or where the government has decided that the periodic determination of revenues, expenses, and net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes. The accounting and financial reporting practices of proprietary funds are similar to those used for business enterprises and focus on capital maintenance and the flow of economic resources through the use of accrual accounting. Of the two types of proprietary funds, MCHCP maintains one type: internal service fund. Internal service funds account for the financing of goods or services provided by one governmental department or agency to another and are expected to be self-supporting through charges to users. MCHCP's purpose is to provide medical insurance benefits to the state of Missouri's and other participating Missouri public entities' employees, retirees, and their dependents.

*Fiduciary funds.* Fiduciary funds account for assets held in a trustee or agency capacity for others and, therefore, cannot be used to support the government's own programs. Fiduciary fund accounting is similar to that used for proprietary funds. The purpose of the SRWBT is to provide health and welfare benefits for the exclusive benefit of current and retired employees of the State and their dependents who meet eligibility requirements, except for those retired members covered by other post-employment benefit (OPEB) plans of the State.

## OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Plan's basic financial statements. Typically, governmental financial statements would be presented as three components: 1) government-wide financial statements; 2) fund financial statements; and 3) notes to the financial statements. However, because the Plan has only proprietary and fiduciary funds, government-wide financial statements are not presented. Proprietary funds present financial statement information in the same manner as government-wide financial statements only with more detail, and government-wide financial statements would be repetitive. In addition, fiduciary funds are not reflected in government-wide financial statements because the resources of that fund are not available to support MCHCP's own programs.

MCHCP presents the ISF and SRWBT on separate fund financial statements. For the ISF, the basic financial statements are comprised of the Statement of Net Position; the Statement of Revenues, Expenses and Changes in Net Position; and the Statement of Cash Flows. For SRWBT, the basic financial statements are comprised of the Statement of Fiduciary Net Position and the Statement of Changes in Fiduciary Net Position. The Notes to the Financial Statements are also part of the basic financial statements and apply to both the ISF and SRWBT. The financial statements are prepared on the accrual basis in accordance with U.S. generally accepted accounting principles applicable to governmental benefit plans.

The Statement of Net Position and Statement of Fiduciary Net Position present MCHCP's financial position as of the end of the fiscal year for each fund. Information is displayed as assets and liabilities, with the difference between the two reported as net position or deficit. The net position of MCHCP reflects the resources available as of the end of the fiscal year to pay benefits when due. Over time, increases and decreases in net position measure whether MCHCP's financial position is improving or deteriorating.

The Statement of Revenues, Expenses and Change in Net Position and the Statement of Changes in Fiduciary Net Position present information detailing the revenues and expenses that resulted in the change in net position that occurred during the current fiscal year. All revenues and expenses are reported on an accrual basis. This means that the revenue or expense is recognized as soon as the underlying event giving rise to the change occurs, regardless of when the actual cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods. For example, contributions due from a public entity, even though not yet paid by year end, will be reflected as revenue. Likewise, claims that occurred during the fiscal year under self-funded plans will be reflected as an expense, whether or not they have been paid as of the end of the fiscal year.

The Statement of Cash Flows presents the cash inflows and outflows of the ISF categorized by operating, capital and related financing, and investing activities. It reconciles the beginning and end of year cash balances contained in the Statement of Net Position. The effects of accrual accounting are adjusted out and noncash activities, such as depreciation, are removed to supplement the presentation in the Statement of Revenue, Expenses and Change in Net Position. A statement of cash flows is not required for the SRWBT.

The Notes to Financial Statements follow the above basic financial statements and provide additional information that is essential to a full understanding of the data provided in the financial statements.

## FINANCIAL ANALYSIS

The following tables present summarized financial position and results for the fiscal years ending June 30, 2019 and 2018. Additional details are available in the accompanying basic financial statements.

### Summary Comparative Statements of Net Position

Current assets for the ISF decreased slightly for the year ended June 30, 2019 due to decreases in cash and cash equivalents as a result of operating activities. Capital asset activity reflects purchases primarily in technology and data protection necessary for operations and have remained relatively constant for the periods ended June 30, 2019 and 2018, respectively. Since the adoption of GASB Statement No. 68, *Accounting and Financial Reporting for Pensions*, the Plan has recognized deferred outflows of resources for pension contributions made and expensed of \$2,303,698 and \$2, 662,699, respectively for the periods ended June 30, 2019 and 2018.

Unearned premiums and other liabilities for the periods ended June 30, 2019 and 2018 are primarily influenced by the State's contribution at June 30th for each of the years ended and the level of contribution applicable to each receipt. The ISF unearned premiums at June 30, 2019, decreased over fiscal year 2018, due primarily to the State's contribution at June 30, 2019 and the respective levels of appropriated funding from the State included with these receipts. Unearned premiums and other liabilities are most significantly influenced by the state's payroll cycle and the amount, timing, and enrollment mix of receipt of premium payments to MCHCP prior to the effective date of coverage.

Noncurrent liabilities existing at June 30, 2019 and 2018 reflect the Plan's net pension liability related to GASB No.68, *Accounting and Financial Reporting for Pensions*.

Net position represents the value of the ISF's assets after liabilities are deducted. The improvement in net position for the ISF at June 30, 2019 over 2018, is primarily the result of decreases in medical and pharmacy expenses associated with utilization and claim unit costs and their impact on plan assets and liabilities. The MCHCP Board of Trustees continues to assess the best and appropriate combination of benefit design with available funding from both the State and members. Ultimately, claims costs for state employees and retirees are backed by the state of Missouri should contributions not be sufficient to cover claims expenditures and operational costs of the Plan.

## Summary Comparative Statement of Fiduciary Net Position

Cash and cash equivalents decreased primarily due to the timing of investment strategies and activity as approved by the Board of Trustees and performed by the Plan's investment manager. The decrease in amounts due from MCHCP at June 30, 2019, over 2018, reflect the decrease in incurred but not reported (IBNR) estimates related to the inclusion of the Group Medicare Advantage (PPO) Plan at mid fiscal year, Jan. 1, 2019.

Contractual market check provisions associated with retail brand scripts increased prescription drug rebates for the SRWBT, and are a contributor to the increase in net position at June 30, 2019, to over \$139.5 million, compared to \$129.9 million at June 30, 2018.

## Summary Comparative Fiduciary Net Position

## Summary Comparative Statements of Revenue, Expenses & Changes in Net Position

State/Employer contributions for fiscal years 2019 and 2018, for the ISF totaled \$400,006,662 and \$334,208,126, respectively. Funding for the years represented are attributable to the State's appropriation to fund the claims costs and operations expense attributable to State employee health benefits. Ultimately, claims costs for state employees are backed by the State of Missouri should State/Employer contributions not be sufficient to cover claims expenditures and operational costs.

Member contributions for the ISF for the years ended June 30, 2019 and 2018, are influenced primarily by total enrollment, the mix of enrollment, the relative plan design for the respective years, and the State's commitment to provide premium contributions through employer subsidy and employee participation in wellness initiatives.

Public entity enrollment at June 30, 2019, decreased approximately two percent over enrollment at June 30, 2018, although premium contributions increased slightly reflecting the mix of enrollment and premium trends. Public entity contributions for the years ended June 30, 2019 and 2018 were \$7,870,921 and \$7,559,037, respectively.

Pharmacy rebate increases at June 30, 2019 over 2018 are primarily influenced by the Plan's increased prescription drug expenditures, active enrollment, and the related contractual rebate improvements.

Medical claims and capitation expense decreased by over six percent during fiscal year 2019, and was primarily related to the Plan's two percent decrease in covered lives at June 30, 2019 over 2018. These decreased expenditures are reflected in the ISF's improved net position at June 30, 2019, over June 30, 2018.

## Summary Comparative Statement of Revenue, Expenses & Changes in Net Position

### Internal Service Fund

### **Summary Comparative Statement of Changes in Fiduciary Net Position**

Employer contributions for the SRWBT for the years ended June 30, 2019 and 2018, respectively were \$82,619,621 and \$68,901,880 and are attributable to the State's appropriation to fund the claims costs and operations expense attributable to State employee retiree health benefits. Ultimately, claims costs for state employees and retirees are backed by the state of Missouri should State/Employer contributions not be sufficient to cover claims needs.

MCHCP participates in a Medicare Prescription Drug Plan to provide coverage to Medicare-primary retirees and dependents. The program provides greater savings to the employer over the historical retiree drug subsidy (RDS). During fiscal years 2019, and 2018 the SRWBT received \$41,544,557 and \$35,501,734 for retiree drug subsidy and other rebates.

Medical claims and capitation expense increased for the SRWBT during the period ended June 30, 2019, primarily due to increased retiree enrollment of approximately two percent in the SRWBT.

## SUMMARY

MCHCP remains committed to providing comprehensive and affordable health care to the members we serve, effectuating sound fiscal practices as stewards of Plan resources, and remaining diligent in our efforts in providing member education to facilitate member satisfaction and cost containment. Wellness and disease management programs are incorporated in an effort to promote healthy member outcomes, engage members in their health, and to promote cost containment. Operating expenses and vendor costs remained relatively stable due to competitive procurement with investments in technology and automation in Plan operations. Medical and pharmacy costs reflect expected fluctuations due to increases in high cost claimants, the emergence of specialty drug cost prevalence and anticipated medical claim trends. Self-funded expenditures, are indicative of the attention to health risk profiles of the MCHCP population and management initiatives surrounding benefit design, care management and wellness. For over five years, the Plan's *Strive for Wellness*® Health Center has offered an additional opportunity to promote appropriate utilization, provide members with additional access to services, while continuing to pursue avenues for cost containment. The health center continues to report optimum member satisfaction results in excess of 99% while continuing to provide opportunities for members to pursue health management in a convenient setting.

MCHCP's cash is invested conservatively to preserve principal and maintain liquidity. In addition, the Plan utilizes a master investment policy and instruments are predicated on an asset allocation model approved by the Board of Trustees. Investment income for the ISF and SRWBT consists of interest income, unrealized gains and losses in fair value, accretion of discounts, and amortization of premiums. Investment income for the ISF and the SRWBT in total was realized in the amount of \$7,379,751 and \$5,901,332 for the fiscal year's ended June 30, 2019 and 2018, respectively, and is predicated on the availability of investable assets and the economic conditions influencing market conditions.

MCHCP's actuary reviews the financial assets of MCHCP in conjunction with obligations and the funding available as provided by the Missouri General Assembly. Due to the state of economic conditions facing the State, the MCHCP, members of the General Assembly, and the State's Office of Budget and Planning meet regularly to discuss funding needs and projected claims expenditures in an effort to develop funding levels for the Plan. Ultimately, the funding of claims costs are backed by the State of Missouri should contributions be unable to meet claims obligations.

During the years presented, MCHCP faced a tightened State budget, which compelled it to continue to pursue opportunities in cost containment, member engagement in healthy outcomes and changes to benefit offerings. Combined with expected continued escalation in health care costs, MCHCP faces significant challenges in an effort to provide affordable health care coverage to its members. As a result, MCHCP has explored a full range of viable options to accommodate the State budget while continuing to offer comprehensive and affordable coverage to its members. Wellness and care management programs that encourage member engagement are the progressive instrument to continue to foster healthier outcomes and reduce claims expenditures. The overall financial position of MCHCP is reliant upon state funding, cost containment and comprehensive benefits review of the self-funded programs to continue to generate a healthier membership in MCHCP.

## REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of MCHCP's financial position for all those with an interest in MCHCP. Questions concerning any of the information provided in this report or requests for additional information should be addressed to the Missouri Consolidated Health Care Plan, 832 Weathered Rock Court, PO Box 104355, Jefferson City, Missouri 65110-4355.

# Notes to Financial Statements

## 1. GENERAL INFORMATION

The Missouri Consolidated Health Care Plan (the Plan) was statutorily created and organized on January 1, 1994, with the purpose of providing medical insurance benefits to the State of Missouri's (State) employees, retirees and their dependents as well as other Missouri public entity employees, retirees and their dependents. Prior to 1994, medical insurance benefits for the State's employees, retirees and their dependents were provided by Missouri State Employees' Retirement System (MOSERS) medical care plan. On January 1, 1994, through a transfer agreement between the Plan and MOSERS, all medical care plan assets and liabilities were transferred to the Plan.

The Plan currently has approximately 93,000 active and retired State members and dependents, 1,028 public entity members and dependents, and more than 94,000 covered lives, and is funded through both employer and employee contributions. Through December 31, 1994, all Plan members were State employees, retirees and their dependents. Beginning January 1, 1995, additional members included public entity employees, retirees and dependents.

State contribution rates are based on the State's approved appropriation and the number of anticipated participants. State employee and public entity contribution rates are established by the Plan's Board of Trustees based on contractor bids for the plan year and budgeted employer contributions.

MCHCP is a risk pool and administers an "agent multiple employer plan" because each employer remains individually responsible for financing its own commitment to provide benefits to its participants, including any eligible retirees. As a result of the implementation of GASB Statement No. 43, *Accounting and Financial Reporting for Postemployment Benefits Other than Pensions*, MCHCP created a separate fiduciary trust fund (State Retiree Welfare Benefit

Trust, or SWRBT) to handle the post-employment benefits for State employees. GASB Statement No. 43, was supplanted when in June 2015, GASB issued GASB Statement No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, which is to be instrumental in improving financial reporting by state and local governmental postemployment benefit plans other than pension plans. GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, was also issued in June 2015 adding the requirement of recognition for the Other Postemployment Benefits (OPEB) liability in its entirety and a more comprehensive measurement of OPEB expense effective for the fiscal year ended June 30, 2018.

SRWBT was established and organized on June 27, 2008, pursuant to the Revised Statutes of Missouri (2000) as amended ("RSMo") 103.003 through 103.178 to provide health and welfare benefits for the exclusive benefit of current and future retired employees of the State and their dependents who meet eligibility requirements except for those retired members covered by other post-employment benefit (OPEB) plans of the State. The SRWBT is considered a cost-sharing multiple employer plan because it covers various State agencies and legally separate component units. It is administered by Plan staff under the direction of the Plan Board of Trustees. The SRWBT does not issue a separate audited financial report.

Since June 30, 2009, the net position and activity related to active participants are reported in the Internal Service Fund (ISF), and the net position and activity related to retired participants are reported in the SRWBT in the accompanying financial statements. In the following footnotes, the term "the Plan" refers to both the ISF and SRWBT. Disclosures that are specific to the ISF or SRWBT are separately noted.

The Plan is considered a part of the State's financial reporting entity and is included in the State's financial report as a component unit. As the Plan is considered a political subunit of the State and provider of essential governmental services, it is not subject to federal income taxes, nor to the provisions of the Employee Retirement Income Security Act of 1974. The Plan is administered according to Missouri statutes. These statutes do not include a provision for the termination of the Plan.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities; the disclosure of contingent assets and liabilities at the date of the financial statements; and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### A. Basis of Accounting

The financial statements of the ISF are intended to present the financial position and the changes in cash flows of only that portion of the activities attributable to the transactions of the ISF. The ISF is accounted for as a proprietary fund.

The Plan's financial statements for the ISF were prepared using the accrual basis of accounting, in accordance with GAAP, as prescribed by the Governmental Accounting Standards Board (GASB). GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*, establishes the GAAP hierarchy for

proprietary funds. The financial statements of the SRWBT are intended to present the financial position and the changes in cash flow of only that portion of the activities attributable to the transactions of the SRWBT.

Benefits and refunds of the SRWBT are recognized when due and payable in accordance with the terms of the plan. The SRWBT is accounted for as a fiduciary fund. Accordingly, the financial statements are prepared using the accrual basis of accounting in conformity with GAAP.

## **B. Method Used to Value Investments**

Investments are reported at fair value on a trade-date basis with changes in fair value recorded in investment income on the statement of revenues, expenses and change in net position. Investments are recorded at fair value as determined by quoted market price, when available, or estimated fair value when not available. Many factors are considered in arriving at that fair market value. In general, however, bonds and mortgages are valued based on yields currently available on comparable securities of issuers with similar credit ratings. Realized gains and losses are based on the specific identification basis. The calculation of realized gains and losses is independent of the calculation of the change in net unrealized gains and losses.

## **C. Deposits & Investments**

The Plan considers all highly liquid investments, readily convertible into cash with original maturities of three months or less, to be cash equivalents.

### **Custodial Credit Risk**

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the Plan would not be able to recover deposits or collateral securities in the possession of an outside party. In an effort to mitigate custodial credit risk, the Plan requires the bank to sweep the accounts each night into overnight repurchase agreements for which the underlying securities must be of the type approved by the State. All remaining cash balances are to be insured or appropriately collateralized.

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to the transaction, the Plan would not be able to recover the value of investments or collateral securities in the possession of an outside party. The Plan does not have a formal policy regarding custodial credit risk. However, the bank acting as the investment manager has been approved by the Plan's Board of Trustees.

### **Deposits**

Cash balances represent operating bank account balances. To maximize investment income, the float caused by outstanding checks is invested in overnight repurchase agreements, thus causing a negative carrying value.

At June 30, 2019, cash held in the financial institution had a bank balance of \$139,062 and a carrying value of (\$14,852,210). Of the bank balance, \$139,062 was covered by federal depository insurance. The remaining \$71,903,217 of cash and cash equivalents are held in repurchase agreements and fully collateralized with securities held by a third-party financial institution in the Plan's name.

The Plan's contracted yield on its overnight repurchase agreements was 17 basis points above the prevailing 91-day U.S. Treasury Bill rate as of June 30, 2019.

### **Investments**

The Plan's investment policy for the ISF is predicated on the primary objectives of safety, liquidity, and yield, in order of priority. Investments in bankers' acceptances and commercial paper are required to mature and become payable not more than 180 days from the date of purchase. All other investments are required to mature and become payable not more than five years from the date of purchase. The weighted average life should not exceed three years and should be consistent with the investment objectives.

The Board of Trustees adopted an asset allocation model for the SRWBT that implemented a moderate investment approach allocating 33 percent to equities. This approach was approved to steadily increase the exposure of the SRWBT to higher return asset classes over time. Exposure to equities will be through a combination of actively managed index funds and/or exchange traded funds that are highly rated and reviewed regularly. Allocations are back-tested, and future assets are projected in all models. The Plan follows the "prudent person" rule for investment

decisions. Essentially, the Plan operates as a prudent person acting in a like capacity and familiar with similar matters would act in the conduct of an enterprise of a like character and with like aims. Any person with fiduciary responsibilities with respect to the Plan is covered by this “prudent person” rule.

Additional information regarding investment services can be found in the Investments section of this report. As of June 30, 2019, the Plan had the following investments as presented below.

## Investments

### State Retiree Welfare Benefit Trust

	2019 Fair Value
<b>Investments</b>	
U.S. Government Agencies (AGCY)	\$36,117,358
Mutual Funds	22,845,581
Mortgage Backed Securities (MBS)	18,270,549
Equity	18,170,445
Corporate	13,271,178
Collateralized Mortgage Obligations (CMO)	8,570,114
U.S. Treasury	999,779
<b>Total Investments</b>	<b>\$118,245,004</b>

### Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the ISF's investment in a single issue. To mitigate this risk, the ISF's investment policy provides general guidelines on diversification.

Investments in U.S. Treasuries and securities, collateralized time and demand deposits, and collateralized repurchase agreements can constitute up to 100 percent of the investment portfolio; U.S. government agencies, including mortgage-backed securities, cannot exceed 60 percent of the portfolio; and U.S. government agency callable securities, bankers' acceptances and commercial paper cannot exceed 30 percent of the portfolio. The SRWBT has implemented an investment approach allocating 33 percent to equities.

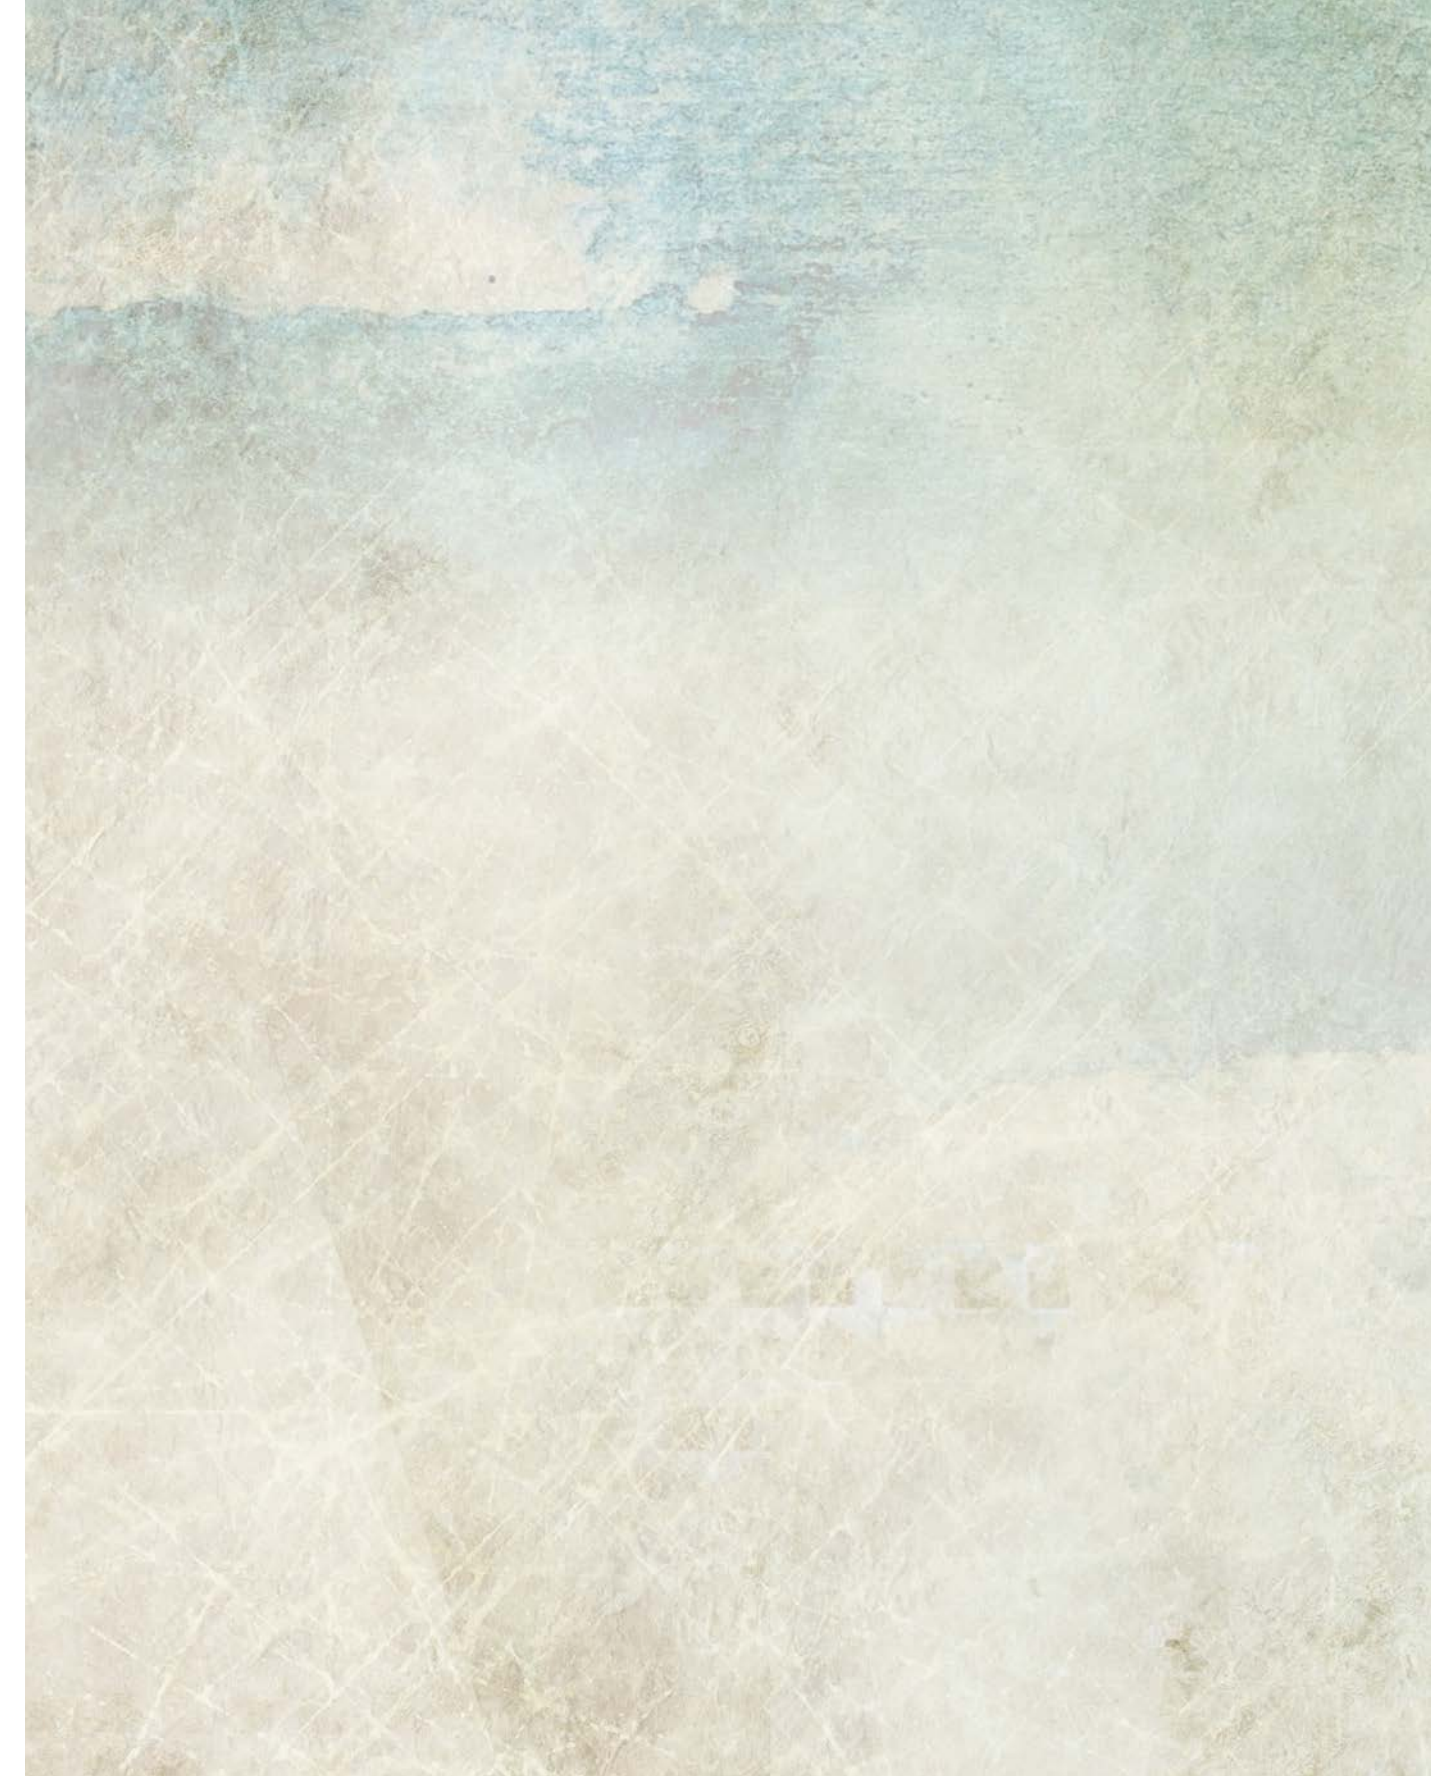

### Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation. The Plan minimizes this risk by only authorizing investment types approved by the Treasurer of the State of Missouri, limiting investments to the safest types of securities, and diversifying the portfolio so potential losses on individual securities will be minimized. The Plan's investments by credit rating category as of June 30, 2019 are presented below.

## Credit Risk

### State Retiree Welfare Benefit Trust

	2019 Fair Value	2019 Ratings
Investments		
U.S. Agencies	\$36,117,358	Aaa
Mutual Funds	22,845,581	3-Star
U.S. Government Guaranteed Mortgages	18,270,549	Aaa
Equity	18,170,445	A
Corporate	13,271,178	A
Collateralized Mortgage Obligations	8,570,114	Aaa
U.S. Treasury	999,779	Aaa
Total Investments	\$118,245,004	

## Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The Plan minimizes this risk by structuring the portfolio so securities mature to meet cash requirements for ongoing operations, using cash flow modeling to moderate the interest rate risk by reducing any unanticipated security sales that could result in a loss of principal and, maintaining the operating funds primarily in repurchase agreements according to the banking contract.

For the interest rate risk measurement for the Plan, Central Bank employs the duration method. The maturities of the Plan's investments as of June 30, 2019 are presented below.

## Interest Rate Risk

### State Retiree Welfare Benefit Trust

	2019 Fair Value	2019 Duration
Investments		
U.S. Agencies	\$36,117,358	1.83
Mutual Funds	22,845,581	-
U.S. Government Guaranteed Mortgages	18,270,549	3.73
Equities	18,170,445	-
Corporate	13,271,178	5.16
Collateralized Mortgage Obligations	8,570,114	2.83
U.S. Treasury	999,779	0.01
Total Investments	\$118,245,004	

## Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment. The Plan has no investments subject to foreign currency risk.

## Fair Value Measurement

MCHCP categorizes its fair value measurements with the fair value hierarchy established by GASB Statement No. 72, *Fair Value Measurements and Application*. The hierarchy for fair value is as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical instruments in active markets available at the measurement date.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in inactive markets; and model derived valuations in which all significant inputs are corroborated by observable market data.

Level 3 - Valuations derived from valuation methodology in which significant inputs are unobservable.

When available, quoted prices are used to determine fair value. When quoted prices in active markets are available, investments are classified with Level 1 of the fair value hierarchy. MCHCP's Level 1 investments primarily consist of investments in U.S. Treasury obligations for the ISF and U.S. Treasury obligations, equity securities, and mutual funds for the SRWBT. When quoted prices in active markets are not available, fair values are based on evaluated prices received from MCHCP's custodian of investments in conjunction with a third party pricing service and are reported with Level 2 of the fair value hierarchy. The inputs for Level 2 include, but are not limited to, pricing models such as benchmarking yields, reported trades, broker-dealer quotes, issuer spreads and benchmarking securities, among others. MCHCP's Level 2 investments consist of investments for both the ISF and SRWBT of U.S Agency and Mortgage Backed Securities and additionally for the SRWBT Corporate and Collateralized Mortgage Obligations. MCHCP did not maintain any Level 3 investments.

# Investments

## State Retiree Welfare Benefit Trust

	Fair Value June 30, 2019	Fair value measurement at report date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)

U.S. Treasury	999,779	999,779	-	-
Total	\$118,245,004	\$42,015,805	\$76,229,199	-

### D. Interfund Activity & Balances

As disclosed above, the ISF provides all administrative responsibilities related to SRWBT, which has no separate facilities or staff. Expenses directly attributable to SRWBT are charged to SRWBT. Other operating expenses, including personnel, are allocated between the ISF and the SRWBT based on participant counts for retired and active participants.

The balance of the inter fund receivable/payable represents the excess of SRWBT contributions collected by the ISF Plan over expenses paid by the ISF Plan for SRWBT.

### E. Receivables

Beginning January 1, 2014, the Plan began offering an Employer Group Waiver Plan (EGWP), a Medicare

Part D prescription drug plan (PDP) to Medicare eligible retirees and covered Medicare eligible dependents. Estimated revenue is recognized as the SRWBT incurs Medicare eligible retiree prescription drug expenditures. In addition, the Plan receives rebates from its pharmacy benefit manager related to manufacturers' rebates and other guaranteed rebates for non-Medicare Part D prescriptions. For the year ended June 30, 2019, these rebates are allocated between the ISF and the SRWBT based upon their respective claims activity. Estimated revenue is recognized for rebates based on prescription claims counts, historical average rebate per claim, and actual receipts.

Other receivables include interest income and member premium amounts.

## F. Furniture, Fixtures & Equipment

Furniture, fixtures and equipment are capitalized at cost when acquired. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets. Furniture and fixtures are depreciated over a 10-year useful life. Data processing equipment is depreciated over a five-year useful life. The threshold for the capitalizing of fixed assets is \$1,000.

Maintenance and repairs are charged to expense as incurred. The cost and related accumulated depreciation of assets sold or retired are removed from the related accounts, and the resulting gains or losses are reflected as non-operating gains or losses in the statement of revenues, expenses and change in net position. The changes in Furniture, Fixtures and Equipment for the year ended June 30, 2019 are as presented in the chart below.

## Furniture, Fixtures & Equipment

### Missouri Consolidated Health Care Plan

	2019
<b>Additions</b>	
Balance, beginning of year	\$2,229,087
Additions	42,611
Deletions	(119,044)
<b>Balance, End of Year</b>	<b>\$2,152,654</b>
<b>Accumulated Depreciation</b>	
Balance, beginning of year	\$1,941,931
Depreciation expense	109,681
Deletions	(119,044)
<b>Balance, End of Year</b>	<b>\$1,932,568</b>

## **G. Plan Funding**

### **State Appropriations/Contributions**

Funds are appropriated to the Plan by the Missouri State General Assembly. Premiums are received one-half prior to the month of coverage and one-half during the month of coverage. Funds are received by the Plan every two weeks, and coincide with the State's payroll cycle. The State's monthly per-member active contribution for fiscal year 2019, averaged \$902 per month. The State's contribution per member to fund the current fiscal year cost of retiree plan benefits for the year ended June 30, 2019, averaged 5.03% of active employee covered payroll.

The State did not provide additional funding towards future OPEB benefits for the period ended June 30, 2019. All state appropriations are available to pay benefits for both active and retired participants except for the amounts contributed to fund the OPEB reserve.

### **Member Premiums**

Monthly member premiums for State employees are established annually by the Plan's Board of Trustees. These premiums are deducted from employee payroll checks in advance. Additionally, the Plan bills members who are not receiving payroll checks two weeks in advance.

### **Public Entity Premiums**

Monthly public entity premiums are established annually by the Plan's Board of Trustees. The Plan bills the public entities two weeks in advance.

### **Deferred Premium Revenue**

Deferred premium revenue includes premium revenue from the members, public entities and the State received in advance of the month coverage is provided.

### **Operating/Non-operating Revenues**

Operating revenues and expenses reflect items directly related to providing health benefits to members. Non-operating revenues and expenses represent investment

income and other items not directly related to providing health benefits to members.

## **H. Other Post-Employment Benefits**

Employees may participate in state-sponsored medical coverage in retirement based on Plan criteria. At June 30, 2019, there were 22,067 retirees and their dependents who met these eligibility requirements.

For the year ended June 30, 2019, expenditures (net of retiree contributions) of \$120.8 million were recognized for post-retirement medical insurance coverage under the self-funded PPO.

Projections include a broad array of complex social and economic events, such as the emergence of new and expensive medical procedures and prescription drug options, changes in investment rates of return and other uncertainties. As such, the estimate of post-retirement program costs contains considerable uncertainty and variability, and actual experience may vary significantly from the current estimated obligation. Additional information as of the latest actuarial valuation is presented on the opposite page.

# Summary of Key Actuarial Methods & Assumptions

## State Retiree Welfare Benefit Trust

### Valuation Year

July 1, 2018 - June 30, 2019

Actuarial cost method

Entry age normal, level percentage of payroll

Amortization method

30 years, open, level percent of pay

Asset Valuation method

Market value

### Actuarial Assumptions

Discount rate

5.24%

Projected payroll growth rate

4.0%

Inflation Rate

3.0%

### Health care cost trend rate (Medical & prescription drugs combined)

Non-Medicare 6.00% in fiscal year 2019, decreasing by 0.25% per year until an ultimate of 5.00% in 2023.

Medicare 10.00% in fiscal year 2019 and 2020, 22.00% in fiscal 2021, 10.00% in fiscal 2022 and 2023, 9.50% in fiscal 2024, 9.00% in fiscal 2025, 8.50% in fiscal 2026, then 8.00% in fiscal 2027 decreasing by 1.0% per year until an ultimate of 5.00% in fiscal year 2030 and after.

### Employer Disclosures

Participating employers, upon their implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other than Pensions*, are required to disclose additional information with regard to funding policy, the employer's annual OPEB costs and contributions made, the funded status and funding progress of the employer's individual plan, and actuarial methods and assumptions used. Employer disclosures for MCHCP can be found in footnote M.

### I. Medical Claims & Capitation

As of June 30, 2019, the Plan insured approximately 70 percent of its members through PPO contracts. Third-party administrators are paid a contracted administrative fee per subscriber for the self-insured contracts, with the Plan bearing all administrative

and medical claims costs of providing coverage to the members. Enrollment in the High Deductible Health Plan was approximately 13%, while enrollment in the insured Medicare Advantage Plan was 17%.

The liability for estimated accrued claims and processing costs is based on an actuarial estimate of the ultimate cost of settling such claims due and payable as of the balance sheet date (including claims reported and in process of settlement, claims reported but not yet processed for settlement, and claims incurred for services provided but not yet reported or processed for settlement). The estimated actuarial liability reflects certain assumptions, which include such factors as enrollment and utilization. Adjustments to the estimated actuarial liability for the final settlement of claims will be reflected in the year that actual results of the settlement of the claims are made and are known.

As of June 30, 2019, \$3,033,228 is included in accrued medical claims and capitation fee expenses for accrued PPO capitation expenses. Additionally, \$48,389,000 at June 30, 2019, is included in estimated accrued medical costs for claims incurred but not yet paid under the Plan's self-funded products. Although management believes these estimates are adequate, the ultimate liability may be more or less than the amounts recorded.

The methods for making such estimates and for establishing the resulting liabilities are continually reviewed, and any adjustments are reflected in current operations. Contingent liabilities exist with respect to claims covered under the Plan in the event a contracted provider or carrier is unable to meet its obligations to the Plan. Changes in estimated accrued claims for fiscal year 2019 is presented below.

## Summary of Changes in Estimated Accrued Claims

### Internal Service Fund

#### Balances

Balance at beginning of year	2019 \$46,137,000
Current year claims & changes in estimates	489,424,669
Claim payments	(492,741,669)

Balance at End of Year	\$42,820,000
------------------------	--------------

## Summary of Changes in Estimated Accrued Claims

### State Retiree Welfare Benefit Trust

#### Balances

Balance at beginning of year	2019 \$11,908,000
Current year claims & changes in estimates	165,126,633
Claim payments	(171,465,633)

Balance at End of Year	\$5,569,000
------------------------	-------------

## J. Retirement Plan

### General Information About the Pension Plan

**Plan description.** Benefit eligible employees of MCHCP are provided with pensions through the Missouri State Employees' Retirement System (MOSERS) – a cost-sharing multiple-employer defined benefit pension plan. Chapter 104.320 of the Revised Statutes of Missouri grants the authority to establish a defined plan for eligible state and other related agency employees. MOSERS issues an annual Comprehensive Annual Financial Report (CAFR), a publicly available report that can be obtained at [www.mosers.org](http://www.mosers.org).

**Benefits provided.** MOSERS provides retirement, disability, and life insurance benefits to eligible employees. The base retirement benefits are calculated by multiplying the employee's final average pay by a factor multiplied by the years of credited service. The factor is based on the specific plan in which the employee participates, which is based on the employee's hire date. Information on the three plans administered by MOSERS (MSEP, MSEP 2000, and MSEP2011 retirement plans) and how eligibility and the benefit amount is determined for each plan may be found in the Notes to the Financial Statements of MOSERS' CAFR starting on page 30.

**Contributions.** Per Chapter 104.436 of the Revised Statutes of Missouri, contribution requirements of the active employees and the participating employers are established and may be amended by the MOSERS Board of Trustees. Employees in the MSEP2011 Plan are required to contribute 4.0 percent of their annual pay. MCHCP's required contribution rate for the year ended June 30, 2019, was 20.21 percent of annual payroll, actuarially determined as an amount that, when combined with employee contributions, is expected to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the pension plan from MCHCP were \$580,485 for the year ended June 30, 2019.

**Net Pension Liability.** At June 30, 2019, MCHCP reported a liability of \$8,362,210, for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2018, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liability was offset by the fiduciary net position obtained from MOSERS CAFR as of June 30, 2018 to determine the net pension liability.

MCHCP's proportion of the net pension liability was based on MCHCP's actual share of the contributions to the pension plan relative to the actual contributions of all participating employers for MOSERS plan year ended June 30, 2018. At the June 30, 2018 measurement date, MCHCP's proportion was 0.1499 percent, a decrease from its proportion measured using 0.1532 percent as of June 30, 2017, measurement date.

There were no other changes in benefit terms during the MOSERS plan year ended June 30, 2018, that affected the measurement of total pension liability.

**Assumptions.** The total pension liability in the June 30, 2018 actuarial valuation, which is also the date of measurement for GASB 68 purposes, was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.5%
Salary increases	3.0% to 8.5% including inflation
Wage Inflation	2.5%
Investment rate of return	7.25%, compounded annually, net after investment expenses and including inflation

The actuarial assumptions used in the June 30, 2018 valuation were based on the results of an actuarial experience study for the period July 1, 2010 to June 30, 2015. In addition, the investment return assumption was reduced from 7.5% to 7.25% for the June 30, 2018 valuation. Other assumption changes were decreases in the payroll and wage growth assumptions.

**Mortality.** Mortality rates for post-retirement mortality are based on the RP-2014 Healthy Annuitant mortality table, projected to 2026 with Scale MP-2015 and scaled by 120%. The pre-retirement mortality table used is the RP-2014 Employee mortality table, projected to 2026 with Scale MP-2015 and scaled by 95% for males and 90% for females.

**Long Term investment rate of return.** The long term expected rate of return on pension plan investments was determined using a building block method in which best estimates rates of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined

to produce the long term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return for each major asset class included in MOSERS target asset allocation as of June 30, 2018 are summarized in the following table:

## Asset Class Allocation

Asset Class	Policy Allocation	Long-term Expected Real Rate of Return*	Weighted Average Long-Term Expected Real Rate of Return
Opportunistic global equity	38.0%	5.5%	2.1%
Nominal bonds	44.0	1.0	0.5
Commodities	20.0	4.5	0.9
Inflation-linked bonds	39.0	0.8	0.3
Alternative beta	31.0	4.5	1.4
	172.0%		5.2%

\*Represent best estimates of geometric rates of return for each major asset class included

**Discount rate.** The discount rate used to measure the total pension liability was 7.25 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that contributions from employers will be made at required rates, actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods

of projected benefit payments to determine the total pension liability.

**Sensitivity of the proportionate share of the net pension liability to changes in the discount rate.** The following presents MCHCP's proportionate share of the net pension liability calculated using the discount rate of 7.25 percent, as well as what MCHCP's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.25 percent) or 1 percentage point higher (8.25 percent) than the current rate:

## Sensitivity of the Net Pension Liability to Changes in the Discount Rate

	1% Decrease (6.25%)	Current Discount Rate (7.25%)	1% Increase (8.25%)
MCHCP's proportionate share of the net pension liability	\$10,682,030	\$8,362,210	\$6,411,479

**Pension plan fiduciary net position.** Detailed information about the pension plan's fiduciary net position is available in the separately issued MOSERS financial report.

**Pension Expense.** For the year ended June 30, 2019, MCHCP recognized pension expense of \$1,411,896.

**Deferred Outflows of Resources and Deferred Inflows of Resources.** At June 30, 2019, MCHCP reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

## Deferred Outflows/Inflows of Resources Related to Pensions

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$19,031	\$197,976
Changes of assumptions	720,682	0
Net difference between projected and actual earnings on pension plan investments	983,501	0
Changes in proportion and differences between MCHCP contributions and proportionate share of contributions	0	165,965
MCHCP contributions subsequent to the measurement date of 6-30-18	580,485	0
<b>Total</b>	<b>\$2,303,699</b>	<b>\$363,941</b>

MCHCP amounts reported as deferred outflows of resources related to pensions resulting from MCHCP contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2020, of MCHCP's financial

statements. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense in MCHCP's fiscal year following MOSERS' fiscal year as follows:

## Projected Recognition of Deferred Outflows/(Inflows)

### Plan Year ending June 30:

2019	858,140
2020	366,729
2021	133,869
2022	533
Thereafter	-

**Payables to the pension plan.** As of June 30, 2019, MCHCP did not report any payables to MOSERS.

## **K. Deferred Compensation Plan**

The State of Missouri Deferred Compensation Plan is a voluntary defined contribution plan offered in compliance with IRS Code Sections 457 and 401(a). The Plan is administered by MOSERS in accordance with Sections 105.900 to 105.927 of the Revised Statutes of Missouri. MOSERS has retained ICMA-RC for participant account record keeping and processing services since November 2011. The Plan offers all state employees the opportunity to save for retirement with before and after tax (Roth) money. New permanent full-time and part-time employees are automatically enrolled in the plan at a 1% contribution per pay period made via payroll deduction.

Audited financial statements for the State of Missouri Deferred Compensation Plan can be viewed online at [www.moderredcomp.org](http://www.moderredcomp.org).

## **L. Employee Assistance Program**

An employee assistance benefit program is offered to all State employees and their immediate families. The program, serviced through ComPsych, offers six free mental health counseling sessions per problem, per year and can be accessed 24 hours a day through a toll-free number.

## **M. Post-Employment Retiree Health Care**

Employees may participate in state-sponsored medical coverage in retirement based on Plan criteria. At June 30, 2019, there were 22,067 retirees and their dependents who met these eligibility requirements. For the year ended June 30, 2019, expenditures (net of retiree contributions) of \$120.8 million were recognized for post-retirement medical insurance coverage under the self-funded PPO Plan. In addition to the pension benefits described in Note J, the Plan operates a cost sharing multiple employer, defined benefit OPEB plan, the State Retiree Welfare Benefit Trust (SRWBT). Employees may participate at retirement if eligible to receive a monthly retirement benefit from either the Missouri Employees' Retirement System (MOSERS) or another retirement system whose members are grandfathered for coverage

under the plan by law. The terms and conditions governing postemployment benefits, are vested with the MCHCP Board of Trustees within the authority granted under Chapter 103 of the Revised Statutes of Missouri (2000) as amended ("RSMo") 103.003 through 103.178.

**Plan Membership.** At June 30, 2019, membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits - 16,378

Inactive plan members entitled to but not yet receiving benefits\*- 0

Active plan members - 35,851

Active/Inactive plan members who may become eligible to receive benefits - 3,621

\*Once an inactive member (retiree, survivor, disabled, or vested) member terminates his/her coverage, he/she is not eligible to re-enroll at a later date.

**Basis of Accounting.** The SRWBT Plan's financial statements are prepared using the accrual basis of accounting, in accordance with GASB Statement No. 74. The assets of the SRWBT are irrevocable and legally protected from creditors and dedicated to providing postemployment benefits in accordance with terms of the plan. The SRWBT does not issue a separate financial report.

**Contributions.** Contributions are established and may be amended by the MCHCP Board of Trustees within the authority granted under Chapter 103 of the Revised Statutes of Missouri (2000) as amended (“RSMo”) 103.003 through 103.178. The Plan contributes 2.5% of the Plan’s PPO 1250 plan premium for each year of the employee’s service capped at a maximum contribution of 65%. For the year ended June 30, 2019, participants contributed \$51,242,143 toward their required contributions.

**Investments.** The Board of Trustees adopted an asset allocation model for the SRWBT that implemented a moderate investment approach to steadily increase the exposure of the SRWBT to higher return asset classes over time. Exposure to equities will be through a combination of actively managed index funds and/or exchange traded funds that are highly rated and reviewed regularly. Allocations are back-tested, and future assets are projected in all models. No significant changes in the SRWBT investment strategy occurred during the reporting period. The following was the asset allocation at June 30, 2019:

Asset Class	Target Allocation	Long-Term Nominal Rate of Return
Domestic LC Equity	16%	8%
Domestic MC Equity	7%	9%
Domestic SC Equity	7%	9%
Global Equity	5%	6%
Domestic Fixed Income	63%	3%
Cash Equivalents	2%	1%
	<hr/>	
	100%	
	<hr/>	

**Rate of Return.** For the year ended June 30, 2019, the annual money weighted rate of return on investments, net of investment expense, was 4.30%. The money weighted rate of return expresses investment

performance, net of investment expenses, adjusted for the changing amounts actually invested.

Actuarial valuations are developed based upon economic assumptions that are appropriate for the purpose of the measurements, take into account relevant historical and current data, reflect estimates of future experience are free of bias, and include demographic actuarial assumptions that are considered to be reasonable and within a best projection range as described by the Actuarial Standards of Practice. Future actuarial measurements may differ from the current measurements presented in this report due to many factors, including plan experience differing from that anticipated by the economic or demographic assumptions and changes in plan provisions or applicable law.

Projections include a broad array of complex social and economic events, such as the emergence of new and expensive medical procedures and prescription drug options, changes in investment rates of return,

and other uncertainties. As such, the estimate of post-retirement program costs contains considerable uncertainty and variability, and actual experience may vary significantly from the current estimated obligation. Additional information as of the latest actuarial valuation is presented below.

**Actuarial Methods and Assumptions.** The actuarial calculations utilize methodologies and assumptions designed to reduce short-term volatility. The cost method utilized for the valuation year June 30, 2018, was the entry age normal, level percent of pay. Actuarial assumptions include a discount rate of 5.90%, a trend rate for non-Medicare benefits of 6.25% in fiscal year 2018, then decreasing by 0.25% per year until achieving an ultimate rate of 5.0% in fiscal year 2023. The UAAL is amortized as a level percent of pay on an open basis, over a 30 year period.

## OPEB Liability Assumptions

General Inflation Rate	3.00%
Discount Rate	5.24%
Expected Return on Assets	5.50%
Municipal Bond Rate	3.50%
Compensation/Salary Increases	4.00%
Health Care Cost Trend Rate (Med and RX)	Non-Medicare 6.00% in fiscal 2019, decreasing by 0.25% per year until an ultimate of 5.00% in 2023. Medicare 10.00% in fiscal year 2019 and 2020, 22.00% in fiscal 2021, 10.00% in fiscal 2022 and 2023, 9.50% in fiscal 2024, 9.00 % in fiscal 2025, 8.50% in fiscal 2026, then 8.00% in fiscal 2027 decreasing by 1.0% per year until an ultimate of 5.00% in fiscal year 2030 and after.
Administration expense	\$202 per person

**Net OPEB Liability.** The net OPEB liability under GASB 74 was calculated utilizing census data at 7/01/2017. Net OPEB liability as of June 30, 2019, was measured as of June 30, 2018 and the total OPEB

liability used to calculate the net OPEB liability was determined by the actuarial valuation as of June 30, 2019, and is presented below.

## Net OPEB Liability (in thousands)

2019

Net OPEB Liability Components:

Total OPEB Liability	\$1,908,311
Plan Fiduciary Net Position	139,550
Net OPEB Liability	1,768,761
Plan Fiduciary Net Position as a Percentage of Total OPEB Liability	7.31%

## Sensitivity of the Net OPEB Liability to Changes in Healthcare Cost Trend Rates (in thousands)

	1% Decrease in Discount Rate (4.24%)	Current Discount Rate (5.24%)	1% Increase in Discount Rate (6.24%)
Net OPEB Liability	\$2,099,115	1,768,761	1,507,205
	1% Decrease in Trend Rates	Current Trend Rates	1% Increase in Trend Rates
Net OPEB Liability	\$1,487,363	1,768,761	2,126,484

**Development of Discount Rate.** The discount rate was determined as a blend of the best estimate of the expected return on plan assets and, the 20 year high quality municipal bond rate as of the measurement date. For years where expected benefit payments can be covered by projected trust assets, expected returns are used. For years where payments are not expected

to be covered by trust assets, the municipal bond rate is utilized.

MCHCP as an entity is funded through the administrative expense charged to other component units through the contribution rate in accordance with GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. All state agencies and component units are included in the state's post employment retiree health care calculations.

For fiscal year 2019, MCHCP contributed \$144,350 for its employees in accordance with the state's funding policy for post employment retiree health care. These financial statements include the OPEB Plan in which MCHCP participates.

## Notes to Required Supplementary Information for the Year Ended June 30, 2019

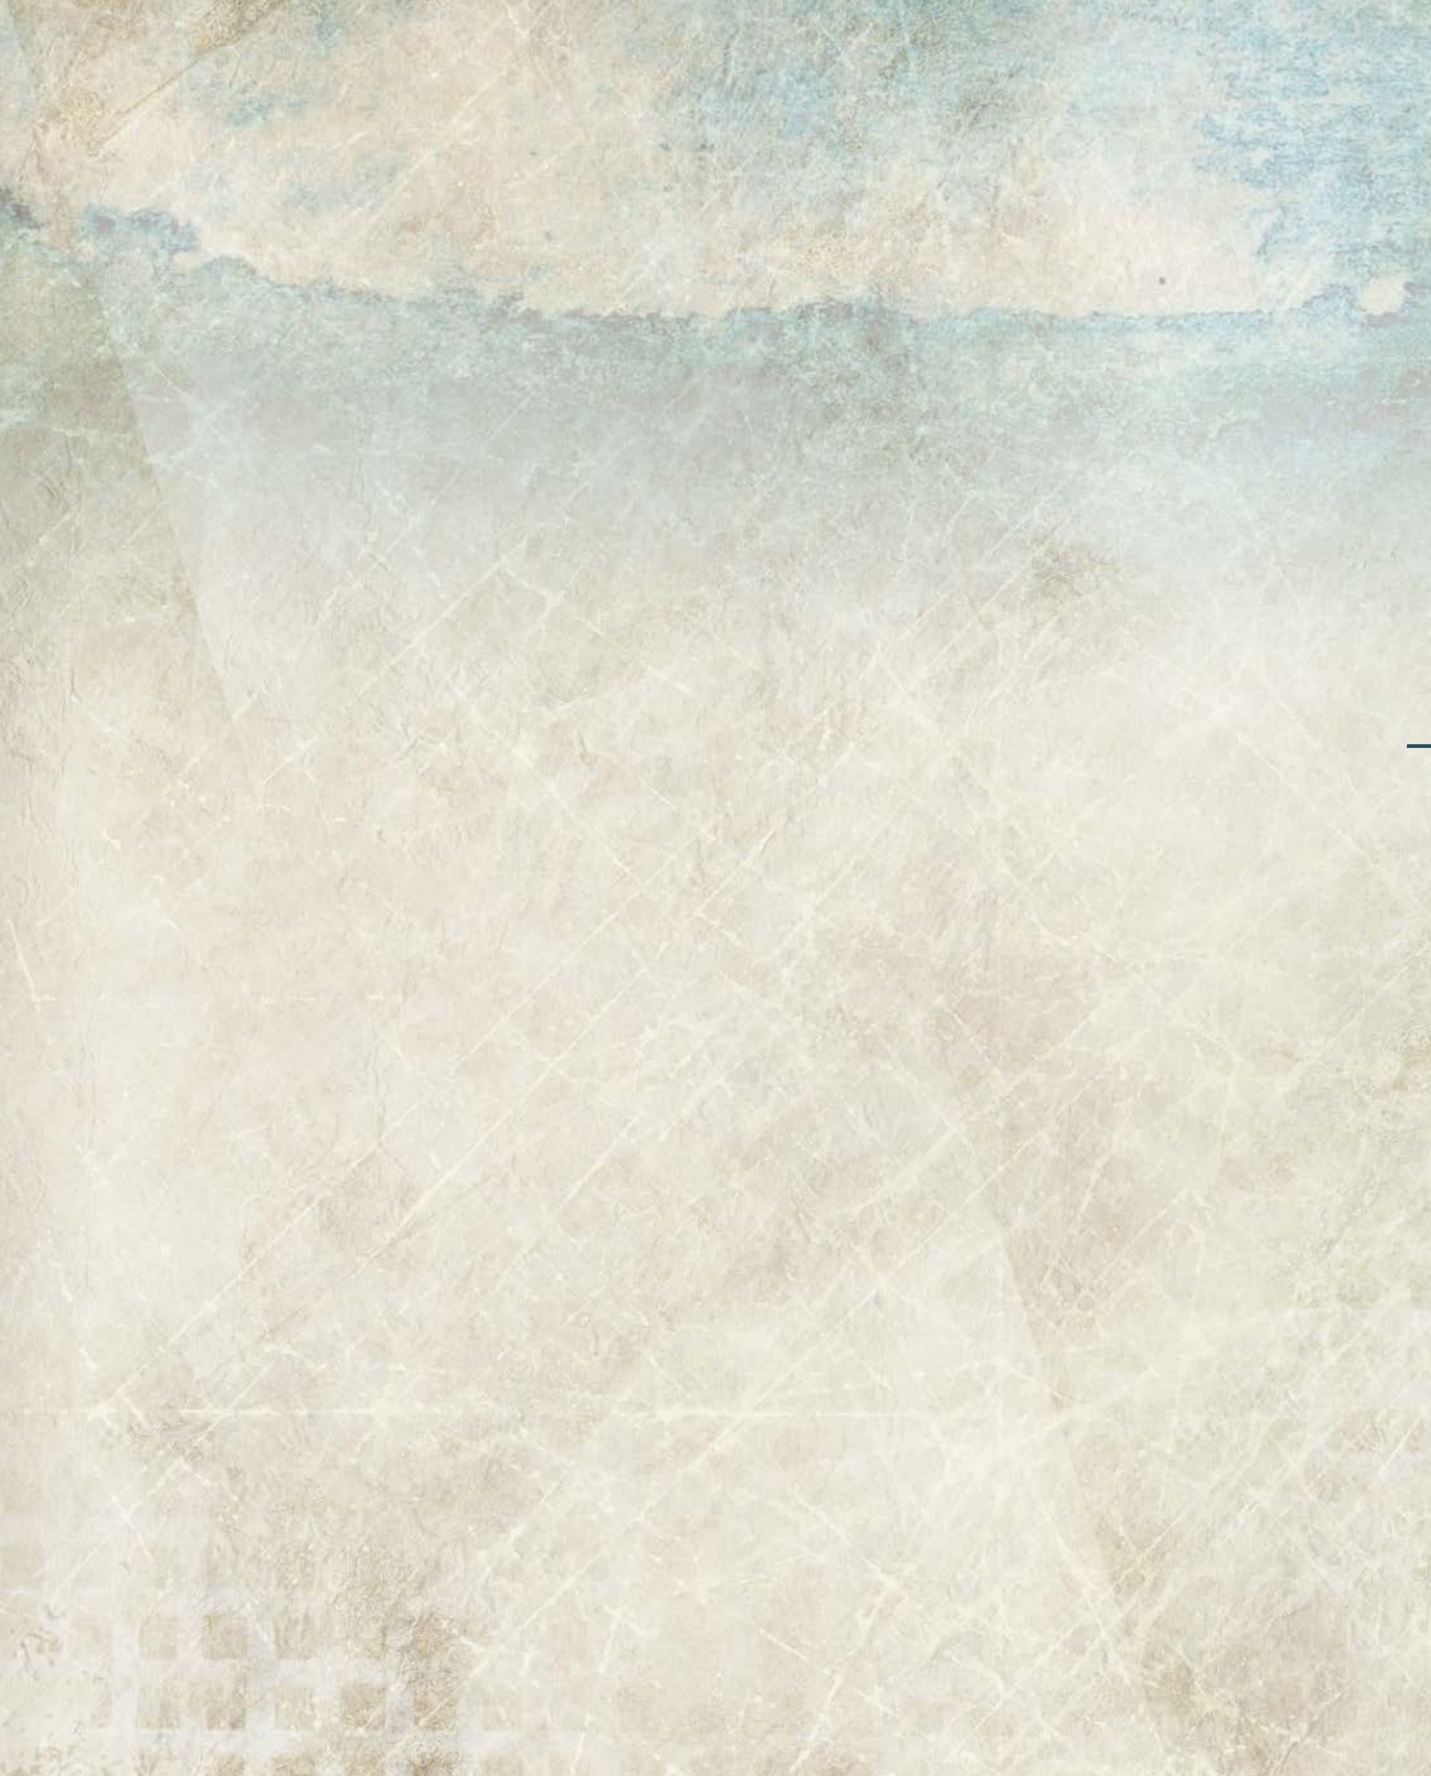

### Changes of benefit terms or assumptions - Pension Plan

**Changes of benefit terms.** Senate Bill 62 (SB 62), which contained changes to the benefit structure for MSEP 2011, was passed by the 2017 legislature. The provisions of the bill decreased vesting from 10 to five years of service, but also included provisions that essentially offset the cost of the vesting change. As a result, SB 62 had no impact on the employer contribution rate, and created a decrease to the UAAL of \$1.6 million.

**Changes of assumptions.** The board reduced the investment return assumption used in the June 30, 2018 valuation to 7.25%.

### Changes of benefit terms or assumptions - OPEB Plan

**Changes of assumptions.** The discount rate was changed to 5.24% from 5.90%. The expected return on asset assumption was changed from 6.50% to 5.50%. Medical benefits for Medicare-eligible participants moved to a Medicare Advantage plan, which decreased the per capita claims cost assumption. Medicare trend was updated to reflect the current drug plan, together with the three-year \$0 medical premium guarantees through the end of 2021, and estimated Medicare Advantage premiums including fees thereafter.

# Investment Advisor Statement

December 12, 2019

Dear Board Members,

The Missouri Consolidated Health Care Plan (MCHCP)'s State Retiree Welfare Benefit Trust (SRWBT) investment portfolio generated a return of 4.30% for the fiscal year ended June 30, 2019. The portfolio ended the year at an all-time high, with a market value, including cash and short-term investments, of slightly more than \$121 million.

Over the past three years, the portfolio returned 5.08%, slightly underperforming its' benchmark, which realized a return of 5.10%, and for the past five years returning 4.23%, outperforming its' benchmark by 0.33%. These increased returns reflect our commitment to the strategies as outlined by the Board of Trustees and our experience and dedication to your fiduciary duties.

The equity portfolio performance ebbed and flowed with the increased volatility in the past year. Value stocks began to perform better in the middle of 2019, as investors moved away from momentum stocks – this seemed to be a repeat of 2018 where participants looked to position their portfolios a bit more defensively.

The underperformance we experienced was in the fixed income portfolio, as interest rates declined rapidly in the middle of 2019. Our portfolio duration was positioned short of its' benchmark and declining interest rates caused our duration to shorten even more.

Looking forward, our approach anticipates:

- Federal Reserve neutrality
- Equity valuations are stretched
- Impact of election cycle

On behalf of Central Bank, we want to express our appreciation to the Board of Trustees and the staff of MCHCP for your continued partnership and support. Your relationship is one of our largest, and as such, we devote significant energy to managing your assets in the best possible manner.

Sincerely,

Michael K. McCoy, CFA

Senior Vice President

## Actuarial

December 9, 2019

Missouri Consolidated Health Care Plan  
832 Weathered Rock Ct.  
PO Box 104355  
Jefferson City, MO 65110

Dear Board Members:

Missouri Consolidated Healthcare engaged Willis Towers Watson US, LLC ("Willis Towers Watson"), to value the Company's other postretirement benefit plan.

As requested by Missouri Consolidated Healthcare (MCHCP), the attached report documents the results of an actuarial valuation of the Missouri Consolidated Healthcare Plan (the Plan). The primary purpose of this valuation is to determine the Net OPEB Liability and the Actuarially Determined Contribution under GASB 74 for the fiscal year ended June 30, 2019. An actuarial valuation for this Plan is performed annually, and as such, the previous valuation report was for the fiscal year ended June 30, 2018.

The attached report is provided subject to the terms set out herein in our contract and the accompanying General Terms and Conditions of Business. The attached report is provided solely for MCHCP's use and for the specific purposes indicated above. It may not be suitable for use in any other context or for any other purpose.

Except where we expressly agree in writing, the attached report should not be disclosed or provided to any third party, other than as provided below. In the absence of such consent and an express assumption of responsibility, no responsibility whatsoever is accepted by us for any consequences arising from any third party relying on the attached report or any advice relating to its contents.

MCHCP may make a copy of the attached report available to its auditors, but we make no representation as to the suitability of the attached report for any purpose other than that for which it was originally provided and accept no responsibility or liability to MCHCP's auditors in this regard. MCHCP should draw the provisions of this paragraph to the attention of its auditors when passing the attached report to them.

Willis Towers Watson  
101 S. Hanley Road  
St. Louis, Missouri 63105  
[willistowerswatson.com](http://willistowerswatson.com)

In preparing these results, we have relied upon information and data provided to us orally and in writing by MCHCP and other persons or organizations designated by MCHCP. We have relied on all the data and information provided, including Plan provisions, membership data and asset information, as being complete and accurate. We have not independently verified the accuracy or completeness of the data or information provided, but we have performed limited checks for consistency.

The attached report does not determine liabilities on a plan termination basis, for which separate extensive analyses would be required.

The results summarized in the attached report involve actuarial calculations that require assumptions about future events. MCHCP is responsible for the selection of the assumptions, as described in Appendix A. We believe that the assumptions used in the attached report are within the range of possible assumptions that are reasonable for the purposes for which they have been used.

The results shown in the attached report have been developed based on economic assumptions that are appropriate for the purpose of the measurements, take into account relevant historical and current data, reflect estimates of future experience and have no significant bias, as well as demographic actuarial assumptions that are considered to be reasonable and within the "best-estimate range" and meet the guidelines set by the Actuarial Standards of Practice. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in the attached report could have been developed by selecting different, but still reasonable, assumptions. Retiree group benefits models necessarily rely on the use of approximations and estimates, and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements.

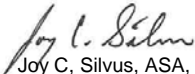

If overall future plan experience produces higher benefit payments or lower investment returns than assumed, the relative level of plan costs or contribution requirements reported in this valuation will likely increase in future valuations (and vice versa). Future actuarial measurements may differ significantly from the current measurements presented in the attached report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions and changes in plan provisions or applicable law. It is beyond the scope of this valuation to analyze the potential range of future Group Retiree Medical contributions, but we can do so upon request.

In our opinion, all calculations are in accordance with requirements of applicable governmental accounting standards, including GASB 74, and the procedures followed and the results presented are in conformity with applicable actuarial standards of practice. This valuation reflects our understanding of the relative provisions of GASB 74.

The undersigned consulting actuaries are members of the Society of Actuaries and collectively meet the "Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to other postretirement benefit plans. Our objectivity is not impaired by any relationship between the plan sponsor and our employer, Willis Towers Watson US, LLC.

## Purpose and Actuarial Statement

Missouri Consolidated Healthcare engaged Willis Towers Watson US, LLC (“Willis Towers Watson”), to value the Company’s other postretirement benefit plan.

As requested by Missouri Consolidated Healthcare (MCHCP), this report documents the results of an actuarial valuation of the Missouri Consolidated Healthcare Plan (the Plan). The primary purpose of this valuation is to determine the Net OPEB Liability and the Actuarially Determined Contribution under GASB 74 for the fiscal year ended June 30, 2019. An actuarial valuation for this Plan is performed annually, and as such, the previous valuation report was for the fiscal year ended June 30, 2018.

This report is provided subject to the terms set out herein in our contract and the accompanying General Terms and Conditions of Business. This report is provided solely for MCHCP’s use and for the specific purposes indicated above. It may not be suitable for use in any other context or for any other purpose.

Except where we expressly agree in writing, this report should not be disclosed or provided to any third party, other than as provided below. In the absence of such consent and an express assumption of responsibility, no responsibility whatsoever is accepted by us for any consequences arising from any third party relying on this report or any advice relating to its contents.

MCHCP may make a copy of this report available to its auditors, but we make no representation as to the suitability of this report for any purpose other than that for which it was originally provided and accept no responsibility or liability to MCHCP’s auditors in this regard. MCHCP should draw the provisions of this paragraph to the attention of its auditors when passing this report to them.

In preparing these results, we have relied upon information and data provided to us orally and in writing by MCHCP and other persons or organizations designated by MCHCP. We have relied on all the data and information provided, including Plan provisions, membership data and asset information, as being complete and accurate. We have not independently verified the accuracy or completeness of the data or information provided, but we have performed limited checks for consistency.

This report does not determine liabilities on a plan termination basis, for which separate extensive analyses would be required.

The results summarized in this report involve actuarial calculations that require assumptions about future events. MCHCP is responsible for the selection of the assumptions, as described in Appendix A. We believe that the assumptions used in this report are within the range of possible assumptions that are reasonable for the purposes for which they have been used.

The results shown in this report have been developed based on economic assumptions that are appropriate for the purpose of the measurements, take into account relevant historical and current data, reflect estimates of future experience and have no significant bias, as well as demographic actuarial assumptions that are considered to be reasonable and within the “best-estimate range” and meet the guidelines set by the Actuarial Standards of Practice. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different, but still reasonable, assumptions. Retiree

group benefits models necessarily rely on the use of approximations and estimates, and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements.

If overall future plan experience produces higher benefit payments or lower investment returns than assumed, the relative level of plan costs or contribution requirements reported in this valuation will likely increase in future valuations (and vice versa). Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions and changes in plan provisions or applicable law. It is beyond the scope of this valuation to analyze the potential range of future Group Retiree Medical contributions, but we can do so upon request.

In our opinion, all calculations are in accordance with requirements of applicable governmental accounting standards, including GASB 74, and the procedures followed and the results presented are in conformity with applicable actuarial standards of practice. This valuation reflects our understanding of the relative provisions of GASB 74.

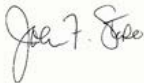

The undersigned consulting actuaries are members of the Society of Actuaries and collectively meet the "Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to other postretirement benefit plans. Our objectivity is not impaired by any relationship between the plan sponsor and our employer, Willis Towers Watson US, LLC.

<sup>1</sup> Rates are expressed on an annual basis where applicable.

## Comments on Results

Appendix A outlines the assumptions and methods used in the valuation. Appendix B outlines our understanding of the principal provisions of the plan being valued.

The trend rate for non-Medicare benefits is assumed to be 6.00% in fiscal 2019, then decreasing by 0.25% per year to an ultimate rate of 5.0% in fiscal 2023. For Medicare benefits, the trend rate is assumed to be 10.00% in fiscal 2019 and 2020, 22.00% in fiscal 2021, 10.00% in fiscal 2022 and 2023, 9.50% in fiscal 2024, 9.00% in fiscal 2025, 8.50% in fiscal 2026, then 8.00% in fiscal 2027 decreasing by 1.0% per year to an ultimate rate of 5.00% in fiscal 2030 and after. The Medicare trend reflects the current drug plan, together with the three-year \$0 medical premium guarantees through the end of 2021, and estimated Medicare Advantage premiums including Affordable Care Act fees thereafter.

The claims development is based on incurred claims experience through December 31, 2017. Costs were developed from the calendar 2019 premium setting process, adjusted to fiscal 2019 using plan trend.

The Total OPEB Liability (TOL) increased from \$1,907.4 at June 30, 2018 to \$1,908.3M at June 30, 2019. The key influencing factors and their impact on the TOL are:

- An increase of \$63.8 million due to the passage of time; the TOL is expected to increase as employees accrue another year of service and as the time value of money is reflected in the liability, but decrease as benefits are paid throughout the year.
- An increase of \$43.3 million due to changes in the demographic data.
- An increase of \$179.2 million due to the change in discount rate from 5.90% to 5.24%.
- A decrease of \$217.4 million due to medical benefits for Medicare-eligible participants moving to a Medicare Advantage plan.
- A decrease of \$68.0 million due to the medical plan change for non-Medicare-eligible participants.

A substantial majority of the savings from moving to a Medicare Advantage plan were not related to a change in benefits being provided. As a result, the impact of this change is being reflected as an assumption change with adjustments to per capita claims costs and trend rates, rather than a plan change.

We have reviewed the impact of the excise tax on high-cost plans (Cadillac plans) that was enacted by the Patient Protection and Affordable Care Act and subject to implementation beginning in 2022 and determined the impact on the retiree health liabilities is negligible. This analysis was based on the permitted blending of the pre-65 and post-65 retiree costs for purposes of determining the applicable excise tax.

## Participant Information

Participant data used in the actuarial valuation are summarized below by the plan sponsor.

<b>Measurement Date</b>	<b>06/30/2019</b>
<b>Census Date</b>	<b>07/01/2018</b>
<b>Active Employees</b>	
1 Total	40,453
2 Average age	45.0
<b>Participants and Spouses in Payment Status</b>	
1 Total	21,132
2 Average age (participants only)	70.1
<b>Participants with a Deferred Benefit</b>	
1 Total	79
2 Average age	53.1
<b>Disabled Participants</b>	
1 Total	90
2 Average age	53.1

Note: Counts do not include spouses of disabled participants. At July 1, 2018 there were 10 spouses.

Counts do not include spouses of terminated vested employees. At July 1, 2018 there were 29 spouses.

<sup>2</sup> Allocation by Total OPEB Liability

## 2.7 Cashflow Projections

Based on benefit costs, retiree contributions, and assumptions shown in Appendix A, the State's expected cash costs (based on enrollments as of July 1, 2018) are projected below.

Fiscal Year	\$ in thousands Cash Cost Net Cost to State
2020	65,140
2021	68,060
2022	74,549
2023	78,531
2024	83,128
2025	88,101
2026	93,361
2027	98,724
2028	104,450
2029	109,597
2039	148,699
2049	159,883
2059	133,227
2069	90,701
2079	47,559
2089	16,759
2098	3,210

## 2.8 Change in Net OPEB Liability

Fiscal Year Ending Measurement Date	06/30/2019 06/30/2019
1. Total OPEB Liability – Beginning of Measurement Period:	\$ 1,907,353,369
a. Service Cost	30,949,128
b. Interest	112,056,572
c. Plan amendments	(67,962,228)
d. Demographic (gains) / losses	43,317,844
e. Assumption changes	(38,191,024)
f. Net Benefit payments	<u>(79,212,270)</u>
g. Net change in TOL	<u>\$ 958,022</u>
h. Total OPEB Liability – End of Measurement Period:	\$ 1,908,311,391
2. Fiduciary Net Position – Beginning of Measurement Period:	\$ 129,934,171
a. Employer contributions	82,619,621
b. Employee contributions	51,242,143
c. Retiree drug subsidy and other drug rebates	41,544,557
d. Net investment income	6,208,661
e. Benefit payments	(165,126,632)
f. Administrative expense	<u>(6,872,338)</u>
g. Net change in FNP	<u>\$ 9,616,012</u>
h. Fiduciary Net Position – End of Measurement Period:	\$ 139,550,183
3. Net OPEB Liability:	\$ 1,768,761,208
4. Funded Ratio: (2)(h) / (1)(h)	7.31%
5. Covered employees' payroll	\$ 1,611,971,760
6. Net OPEB Liability as a percentage of covered payroll: (3)/(5)	109.73%
7. NOL at Measurement Date - Sensitivities:	
a. 1% increase in Discount Rate	\$ 1,507,205,083
b. 1% decrease in Discount Rate	\$ 2,099,115,264
c. 1% increase in Trend Rates	\$ 2,126,483,649
d. 1% decrease in Trend Rates	\$ 1,487,363,479

## Section 3: Participant Information

### 3.1 Participant Information

Participant data used in the actuarial valuation are summarized below by the plan sponsor.

Measurement Date	6/30/2019
Census Date	7/1/2018
<b>Active Employees</b>	
1 Total	40,453
2 Average age	45.0
<b>Participants and Spouses in Payment Status</b>	
1 Total	21,132
2 Average age (participants only)	70.1
<b>Participants with a Deferred Benefit</b>	
1 Total	79
2 Average age	53.1
<b>Disabled Participants</b>	
1 Total	90
2 Average age	53.1

Note: Counts do not include spouses of disabled participants. At July 1, 2018 there were 10 spouses.

Counts do not include spouses of terminated vested employees. At July 1, 2018 there were 29 spouses.

### 3.2 Age and Service Distribution of Participating Employees

Attained Age	Attained Years of Credited Service and Number														Total
	0	1	2	3	4	5-9	10-14	15-19	20-24	25-29	30-34	35-39	40 & Over		
Under 25	1,161	542	242	113	45	12								2,115	
25-29	1,016	765	667	517	391	512	15							3,883

Average: Age	45.0	Number of Participants:									Males	14,978			
											Females	25,475			
Census data as of July 1, 2018															

# Appendix A

## Statement of Actuarial Assumptions and Methods

### Plan Sponsor

State of Missouri

### Statement of Assumptions

The assumptions disclosed in this document are for the June 30, 2019 measurement date. These assumptions are used for liabilities disclosed under GASB 74.

### Economic Assumptions

#### General Inflation Rate

The underlying general inflation assumption behind the discount rate assumption and the health care trend rate assumption is 3.00% per annum. This underlying rate is assumed to apply to all future years in the valuation projections.

#### Discount Rate

5.24% per annum, a detailed development of the discount rate is shown in Appendix C

#### Expected Return on Assets

5.50% per annum

#### Municipal Bond Rate

3.50% per annum

#### Compensation/Salary Increases

4.00% per annum

### Health Care Trend Rates

Health care trend rates are the annual rates of increase expected for benefits payable from the Plan; these rates include Health Care Cost Trend plus the leveraging effect of Plan design.

Fiscal Year	Medical and Rx Combined Rate (non-Medicare)	Medical and Rx Combined Rate (Medicare)
2019	6.00	10.00
2020	5.75	10.00
2021	5.50	22.00
2022	5.25	10.00
2023	5.00	10.00
2024	5.00	9.50
2025	5.00	9.00
2026	5.00	8.50
2027	5.00	8.00
2028	5.00	7.00
2029	5.00	6.00
2030+	5.00	5.00

### Per Capita Claims Costs

Per capita costs for fiscal 2019 are listed below. The per capita costs are net of plan deductibles, coinsurance, and co-payments but are not reduced for retiree contributions. These costs were developed from the calendar 2019 premium setting process, adjusted to fiscal 2019 using plan trend.

Per Capita Cost (excludes administrative expenses)	
Age	FY 2019 Cost
55	\$ 9,392
60	11,133
65	2,306
70	2,453
75	2,644
80	2,669
85	2,354

## Administrative Expenses

For fiscal 2019, we will use a starting value developed from the calendar 2019 premium setting process, adjusted to fiscal 2019 using the general inflation assumption of 3%. Future increases will also be assumed at the general inflation rate of 3%.

For fiscal 2019, the admin expenses used are \$202 per person (apply only for non-Medicare).

## Demographic and Other Assumptions

### Mortality

RP-2016 for Employees/Annuitants without collar adjustments using Scale MP-2016.

### Retirement Probabilities

It is assumed that participants will retire according to the following schedule:

Age	Percent assumed to retire within one year
47-54	2.0% at each age
55	6.0%
56-57	7.0% at each age
58-59	7.5% at each age
60-61	10.0% at each age
62	20.0%
63	17.5%
64	15.0%
65	25.0%
66	27.5%
67-74	22.5% at each age
75	100.0%

### Disability Rates

None assumed.

**Representative Termination Rates (not due to disability, retirement, or mortality)**

During the first five years of service, employees are assumed to terminate according to the following schedule:

Percent assumed to terminate within one year	
Service	Male/Female
0-1	25.0%
1-2	25.0%
2-3	25.0%
3-4	12.0%
4-5	12.0%

After five years of service, we assume withdrawal rates that vary by attained age, as presented below:

Percent assumed to terminate within one year	
Age	Male/Female
20	12.0%
25	10.0%
30	8.5%
35	7.0%
40	5.5%
45	4.5%
50	4.5%
55	3.0%
60	3.0%
65	3.0%

## Retiree Contributions

The State pays a percentage of the premium for a designated plan and subtracts the total state subsidy from the premium cost for the plan chosen by the retiree to determine the retiree contribution amount. This percentage is 2.5% per year of service, up to a maximum of 65%. The retiree pays the remainder of the premium.

FY 2019			
Pre-65		Post-65	
\$	12,096	\$	2,532

The above premiums are developed from the premium rates for the designated plan for the 2019 calendar year, adjusted to fiscal 2019 using plan trend. Future premiums (and thus State and retiree contributions) are assumed to increase with the healthcare cost trend rates.

## Spouse Age Difference

Husbands are assumed to be three years older than wives for future retirees who are married.

## Participation Assumptions for Plan

60% of employees currently enrolled in the program are assumed to elect postretirement health insurance coverage upon retirement.

50% of employees not currently enrolled in the program are assumed to elect postretirement health insurance coverage upon retirement.

Terminated vested employees are assumed to participate at age 60 as follows:

- 5% of those currently under age 40
- 15% of those currently between ages 40 and 49
- 60% of those currently age 50 and over

## Dependent Coverage

50% of future participating male retirees and 30% of future participating female retirees are assumed to have spouses that elect to be covered under the MCHCP plan.

Methods

Census Date/Measurement Date

The measurement date is June 30, 2019. The liability valuation date is July 1, 2018. For purposes of determining benefit obligations as of the measurement date, participant data as of the census date, July 1, 2018 are used.

Funding Policy

Contributions to the plan are determined by the appropriations of the Missouri state legislature. MCHCP requests funding each year equal to the actuarial determined contribution developed based on fully funding the plan's benefit liability in 30 years. For projection purposes, we have assumed approvals by appropriations are equal to the average of the prior five fiscal years, adjusted to the current and future plan years using the plan's assumption for salary inflation.

Actuarial Cost Method

Entry age normal with level percentage of payroll spread.

Asset Method

Not Applicable

Benefits Not Included in Valuation

We believe that we have reflected all significant Plan provisions in this valuation.

Data Sources

Employee data was supplied by the Missouri Consolidated Healthcare as of July 1, 2018.

Assumptions Rationale - Significant Economic Assumptions for Accounting

Discount rate

As required by GASB 74, the discount rate was chosen by the plan sponsor. The discount rate was determined as a blend of the plan sponsor's best estimate of the expected return on plan assets and, as required by GASB 74, the 20-year high quality municipal bond rate as of the Measurement Date. For years where expected benefit payments can be covered by projected trust assets, expected returns are used. For years where payments are not expected to be covered by trust assets, the municipal bond rate is used.

**Expected Return on Assets**

The plan sponsor selected this assumption by considering expected returns on the target asset allocation.

The target allocation and expected return by asset class are shown below:

Asset Class	Allocation	Expected Return
Large cap stocks	16.0%	8.5%
Mid cap stocks	7.0%	8.8%
Small cap stocks	7.0%	8.8%
International stocks	5.0%	9.0%
BarCap Aggregate bonds	63.0%	3.7%
Cash equivalents	2.0%	3.3%

**Rates of increase in plan administrative expenses**

Administrative expenses are projected using general inflation.

**Claims cost trend rates**

Assumed increases were chosen by the plan sponsor and, as required by GASB 74, they represent an estimate of future experience, informed by an analysis of recent plan experience, leading to select and ultimate assumed trend rates. In setting near term trend rates, other pertinent statistics were considered, including surveys on general medical cost increases. In setting the ultimate trend rate, considerations included assumed GDP growth consistent with the assumed future economic conditions inherent in other economic assumptions chosen by the client at the measurement date.

After examining historical variability in trend rates, we believe that the selected assumptions do not significantly conflict with what would be reasonable based on a combination of market conditions at the measurement date and future expectations consistent with other economic assumptions used, other than the discount rate.

In addition, the Medicare trend reflects the current drug plan, together with the three-year \$0 medical premium guarantees through the end of 2021, and estimated Medicare Advantage premiums including Affordable Care Act fees thereafter.

**Participant contribution trend rates**

In accordance with the substantive plan communicated to participants, participant contributions are intended to remain a fixed percentage of total plan costs, and thus the trend rates, and the description of the derivation of the trend rates, are the same as for claims costs as shown above.

**Per capita claims costs**

Per capita claims costs were chosen by the plan sponsor to be the best estimate of the plan's per capita claims costs including expenses in the plan year beginning on the measurement date (with any expected changes in future years reflected in the trend rate assumption).

<b>EGWP Savings</b>	<p>Per capita claims cost assumptions were developed using historical claims, and enrolment information. Raw per capitas were developed and adjusted for completion (i.e., conversion from a paid to an incurred basis), plan changes, and trend.</p> <p>EGWP savings projections were chosen by the plan sponsor to reflect anticipated EGWP savings based on projections provided by EGWP administrator. Anticipated subsidies are included in the claims cost assumptions.</p>
---------------------	---

### Assumptions Rationale - Significant Demographic Assumptions

<b>Healthy Mortality</b>	Assumptions were selected by the plan sponsor and, as required by GASB74, represents a best estimate of future experience.
<b>Termination</b>	<p>Termination rates were based on an experience study conducted in 2012, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.</p> <p>Assumed termination rates differ by age and service because of observed differences in termination rates by service.</p>
<b>Retirement</b>	Retirement rates were based on an experience study conducted in 2012, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
<b>Participation:</b>	
■ Participants	Assumed participation rates reflect historical experience as well as expectations of similar future coverage patterns.
■ Covered spouses	Assumed coverage rates for spouses reflect historical experience as well as expectations of similar future coverage marital patterns.
<b>Marital Assumptions:</b>	
■ Percent married	The assumed percentage married is based on a blending of the marital status of recent retirees and of the current active population.
■ Spouse age	The assumed age difference for spouses is based on historical experience as well as expectations of similar future age differences.

### Source of Prescribed Methods

<b>Actuarial Cost Method</b>	The methods used for GASB purposes as described in Appendix A, including the actuarial cost method, are “prescribed methods set by another party”, as defined in the actuarial standards of practice (ASOPs).
------------------------------	---

### Changes in Assumptions and Methods

<b>Change in assumptions since prior valuation</b>	<p>The discount rate was changed to 5.24% from 5.90%.</p> <p>The expected return on asset assumption was changed from 6.50% to 5.50%.</p>
--	---

Medical benefits for Medicare-eligible participants moved to a Medicare Advantage plan, which decreased the per capita claims cost assumption.

Medicare trend was updated to reflect the current drug plan, together with the three-year \$0 medical premium guarantees through the end of 2021, and estimated Medicare Advantage premiums including Affordable Care Act fees thereafter.

**Change in methods since prior valuation**

None.

# Appendix B

## Summary of Principal Plan Provisions

### Plan Sponsor

State of Missouri

### Plan

Missouri Consolidated Healthcare Plan

### Plan Type

Cost-Sharing Multiple Employer Plan

### Plan Year

The twelve-month period ending June 30, 2019.

### Eligibility

A participant is eligible for coverage if, at the time of termination of state employment, the participant is eligible to receive a monthly retirement benefit from either the Missouri State Employees' Retirement System (MOSERS) or from the Public School Retirement System (PSRS) for State employment, and has met one of the following requirements:

- has had coverage through MCHCP since the effective date of the last Open Enrolment period; or
- has had other health insurance for the six months immediately prior to termination of state employment (proof of insurance required); or
- has had coverage since first eligible.

A participant who terminates employment before being eligible to receive post-retirement coverage will still be eligible upon reaching retirement age if he/she remains enrolled through MCHCP through retirement age. For valuation purposes, it is assumed that they will begin receiving benefits at their earliest eligibility date.

## **Plans Available to Retirees**

PPO 750  
PPO 1,250  
HDHP (HSA)

For 2014 and future years, the prescription drug coverage under these plans for post-Medicare retirees will be provided through an Employer Group Waiver Plan (EGWP).

For 2019 and future years, the medical coverage under these plans for post-Medicare retirees will be provided through a Medicare Advantage Plan.

## **State Contributions**

The contribution amount for a retiree is calculated using the number of full years of service as reported to MCHCP by MOSERS or PSRS times 2.5%, capped at 65% with the actual amount determined by State appropriations. Prior to January 1, 2005, the maximum is 60%.

The percentage paid by the State remains the same at Medicare eligibility.

The State pays a percentage of a designated plan and subtracts the total premium from the plan chosen by the retiree.

For retirements prior to January 1, 2002, the contribution will be the greater of the contribution based on the years of service and the amount being paid at that date. This is re-determined each year for January coverage.

## **Retiree Contributions**

Retirees pay the portion of the premium not covered by the State.

## **Change in Plan Provisions**

PPO plans were changed from deductibles of \$300/\$600 to \$750/\$1,250.

# Appendix C

## Discount Rate Development:

### Missouri Consolidated Healthcare Plan Exhibit 4 - Discount Rate Development

Expected Return on Assets				5.50%					Present Value using EROA and Muni Rate				2,144,927,294

2019 Annual Report 117

# Appendix D

## Glossary

### Actuarial Present Value

The value, as of the valuation date, of amounts payable or receivable thereafter, with each amount adjusted to reflect (a) the time value of money (through discounts for interest) and (b) the probability of payment (to reflect death, disability or termination of employment) between the valuation date and the expected date of payment.

### Actuarially Determined Contribution (ADC)

The plan's normal cost plus an amortization of its unfunded actuarial accrued liability.

### Discount Rate

The rate used to reflect the time value of money. The discount rate is used in determining the present value as of the valuation date of future cash flows currently expected to be required to satisfy the post-employment benefit obligation.

### Gain or Loss

A change in the value of either the actuarial accrued liability or plan assets resulting from experience different from that assumed or from a change in an actuarial assumption.

### Health Care Cost Trend Rates

An assumption about the annual rate(s) of change in the cost of health care benefits currently provided by the post-employment benefit plan, due to factors other than changes in the composition of the plan population by age and dependency status, for each year from the valuation date until the end of the period in which benefits are expected to be paid. The health care cost trend rates implicitly consider estimates of health care inflation, changes in health care utilization or delivery patterns, technological advances, and changes in the health status of the plan participants. Differing types of services, such as hospital care and dental care, may have different trend rates.

### Net OPEB Liability

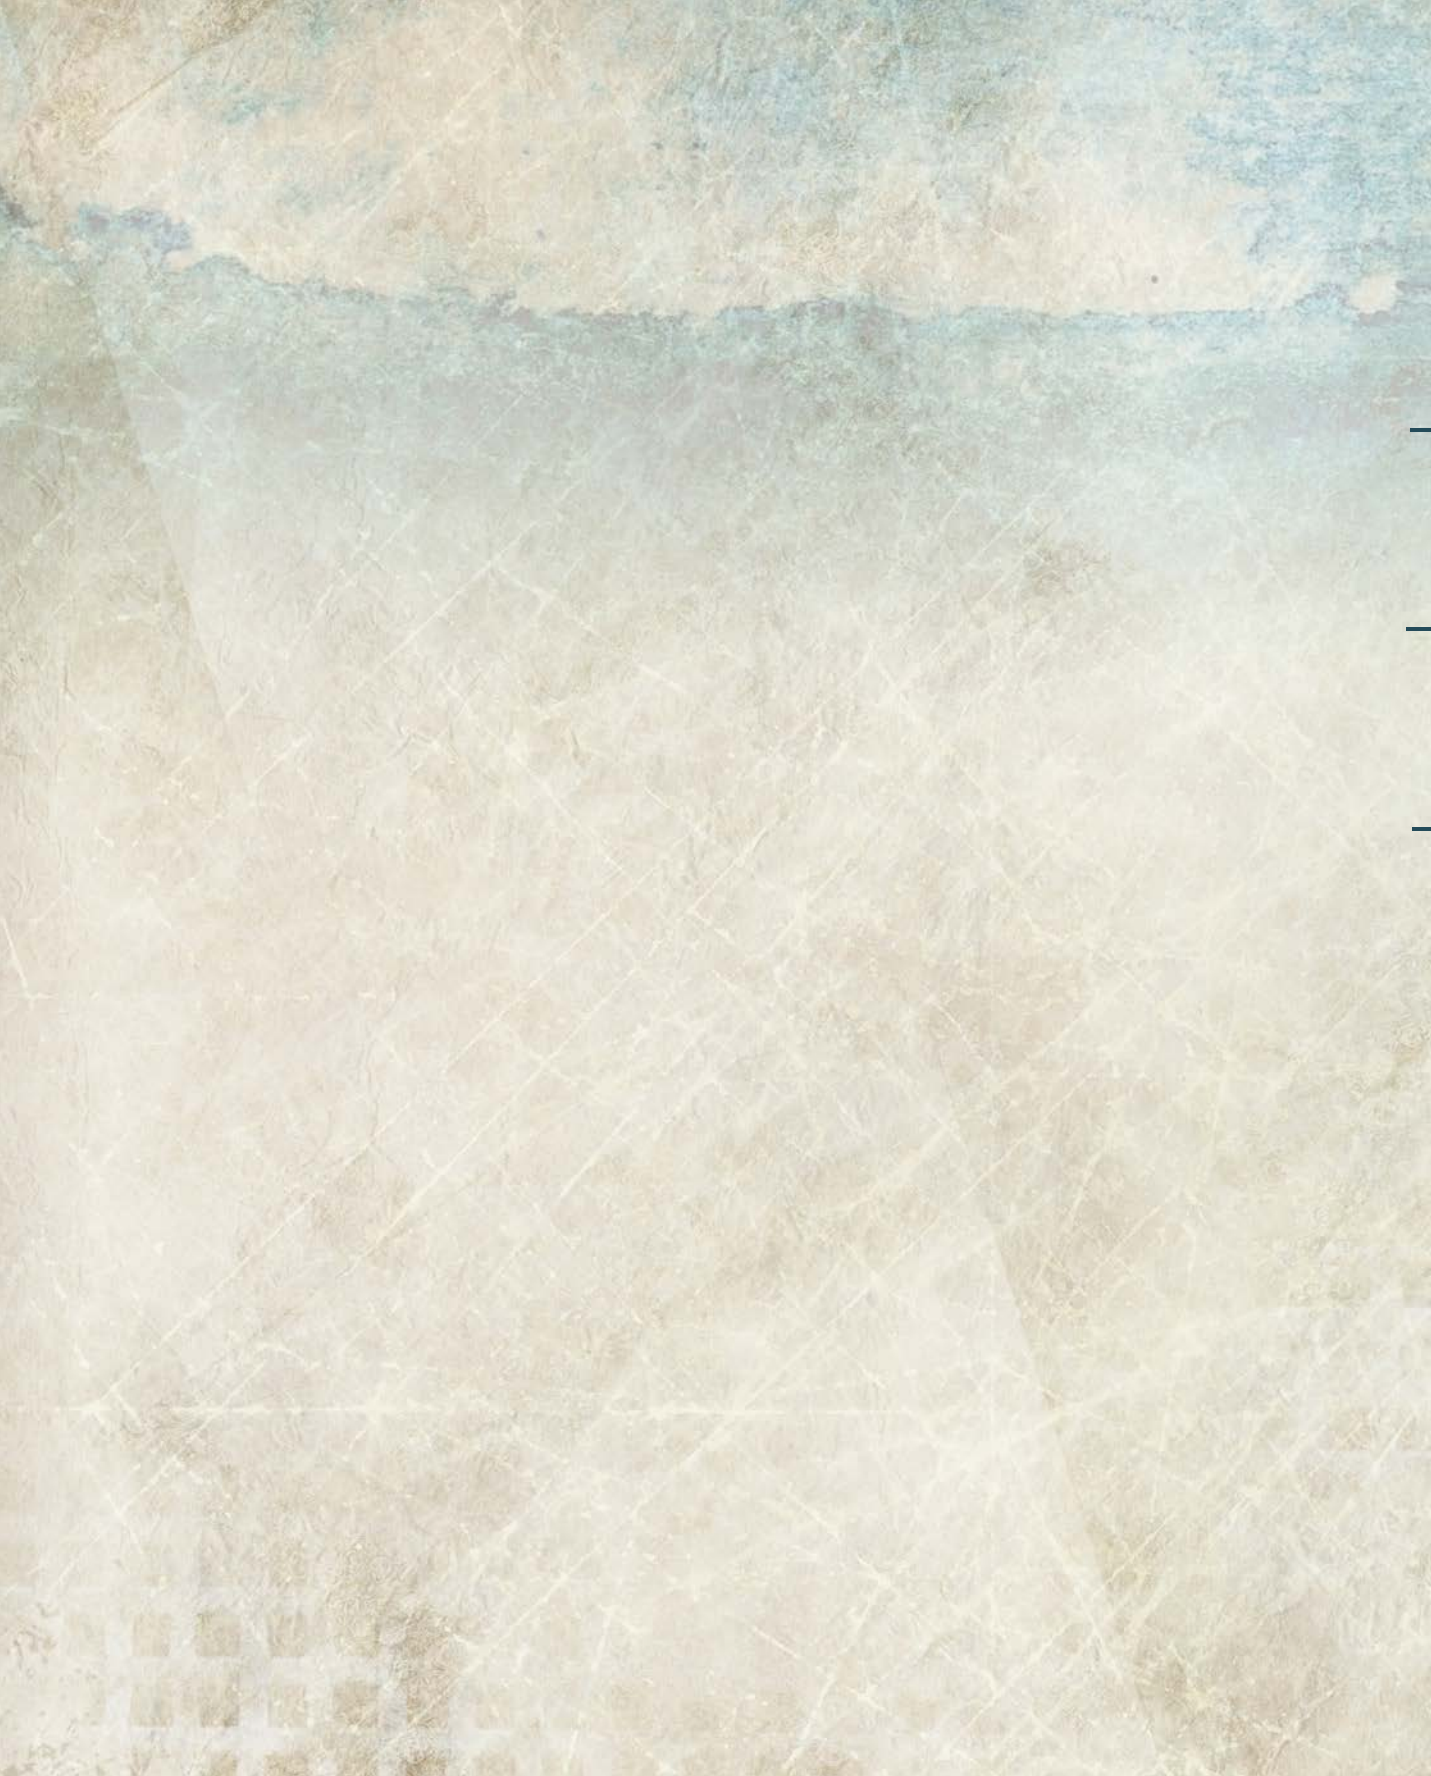

The difference between the Total OPEB Liability and the Net Fiduciary Position.

### Normal Cost/Service Cost

The portion of the expected post-employment benefit obligation attributed to employee service during the year immediately following the valuation date.

### **Total OPEB Liability**

The actuarial present value of benefits attributed to employee service rendered prior to the valuation date.
